Message	Time	Content			
1	Pre-op	To make your eye surgery a success:			
	Day 3	Wash your face and hands before surgery. Keeping your face and hands clean reduces			
		chance of infection. Please watch the videos on using eye drops so you are prepared			
		following surgery.			
		Video 1: https://youtu.be/vjfcIb1nj7Y			
		Video 2: https://youtu.be/vjfcIb1nj7Y			
		Video 3: https://youtu.be/vjfcIb1nj7Y			
		Video 4: https://youtu.be/vjfcIb1nj7Y			
2	Day 0	Rest quietly in a clean place after surgery. You may take paracetamol if you have some			
		pain in the eye. Do not touch the eye. Leave the patch on the eye.			
		Return for a check of the eye tomorrow.			
3	Post-op	Take each of your eye drops 4 times a day (breakfast, lunch, dinner, and bedtime)			
	Day 1	Keep hands, face and eye clean. Keep appointment next week. Call if any problems.			
		Congratulations for making it through surgery!			
4	Post-op	Reminder- your eye appointment is tomorrow. Do not miss your appointment- it will			
		help your eye heal better. Continue taking each of your eye drops 4 times a day			
5	Post-op	Your eye is healing well! Continue taking the eye drops with a pink top (prednisolone			
	Day 8	acetate) 4 times a day. Keep hands and face clean, don't rub or touch the eye.			
6	Post-op	Continue taking the pink cap eye drop (prednisolone acetate) eyedrops 4 times a day.			
	Day 16	Keep hands and face clean			
7	Post-op	You are making good progress! Continue taking the pink capped eyedrop 4 times a day			
	Day 23	Keep your face and hands clean, do not touch the eye			
8 Post-or		Please keep your eye appointment tomorrow! We need to check the eye and help it heal.			
	Day 29				
9	Post-op	Please stop taking the pink capped eye drop. Take care to protect the eye form any			
	Day 30	injuries. Sunglasses can help with too much brightness.
