

Supplementary information, Figure S8

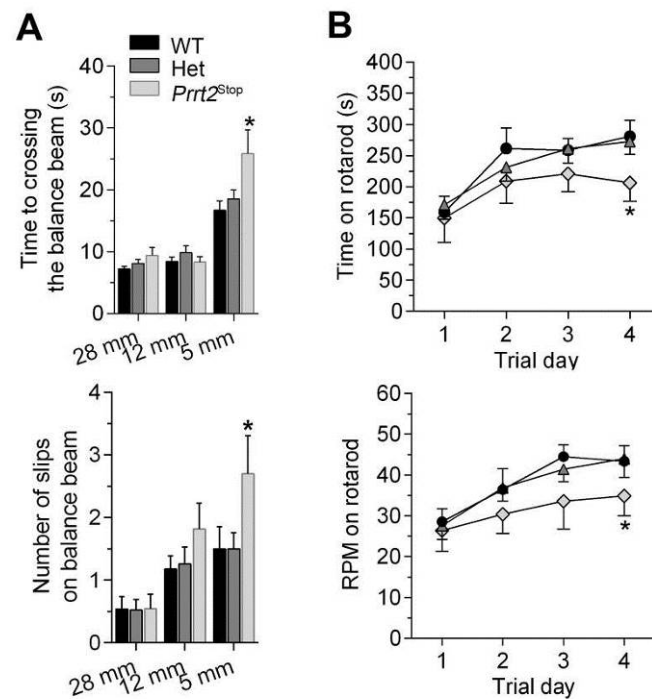

Figure S8 Impaired performance of *Prrt2*-mutant mice in beam walking and Rotarod test. (A) Beam balance test of *Prrt2*^{Stop} mutants and their WT littermates. (B) *Rota rod* test of *Prrt2*^{Stop} mutants and their WT littermates. WT, $n = 14$; heterozygous (Het), $n = 23$; homozygous *Prrt2*^{Stop}, $n = 11$; Error bars, mean \pm SEM. * $P < 0.05$, versus WT; two-way ANOVA test.
