Supplementary Table 1. *Hepacivirus* Member Species

The member species table, provided within the ICTV Online (10th) Report chapters, provides the indicated information on exemplar viruses for each species. The species *Hepacivirus C*, also contains information on additional member viruses that have been classified by the hepacivirus research community as prototypic members of important clades of viruses that may have unique pathogenic, epidemiological, or other biological properties (1, 2).

Supplementary Figure 1. Taxon search. Results from the taxonomy search interface provided from the taxonomy browser web page (<http://ictv.global/virusTaxonomy.asp>). The search set can comprise the entire history of ICTV taxonomy releases, or just the current release. The 'View' link will take the user to the row of the indicated release year in the taxonomy browser for the indicated taxon.

Supplementary Figure 2. Taxonomic proposals. This page provides a list of approved proposals available for download from the ICTV web site file repository (http://ictv.global/Official_ICTV_Proposals.asp) that detail the justification for each taxonomic change.
