

Upregulated SOX9 expression indicates worse prognosis in solid tumors: a systematic review and meta-analysis

SUPPLEMENTARY MATERIALS

Supplementary Figure 1: Forest plot describing the association between over-expressed SOX9 and clinicopathological parameters.

Supplementary Figure 2: Funnel plot for the assessment of potential publication bias regarding clinicopathological parameters in the meta-analysis.

Supplementary Table 1: Summarized data of clinical and pathological parameters from the eligible studies

First author	Gender		Tumor Differentiation				Tumor Size				Lymph Node Metastasis				Distant Metastasis				Clinical Stage					
	Male	Female	Poor+Moderate/undifferentiated		Well/differentiated		T3-4		T1-2		Yes		No		Yes		No		III-IV		I-II
