

Supplementary Figure 2

Supplementary Figure 2: Functional enrichment of differentially expressed genes. IPA enrichment analysis was performed on all differentially expressed genes (non-parametric t-test $p < 0.05$) independently of their FC. The $-\log(p\text{-values})$ of most significant functions are plotted in a histogram format for both D9 p.i. and M3 p.i., in each tissue including RBs, PLNs, and PBMCs.
