

FIG S2

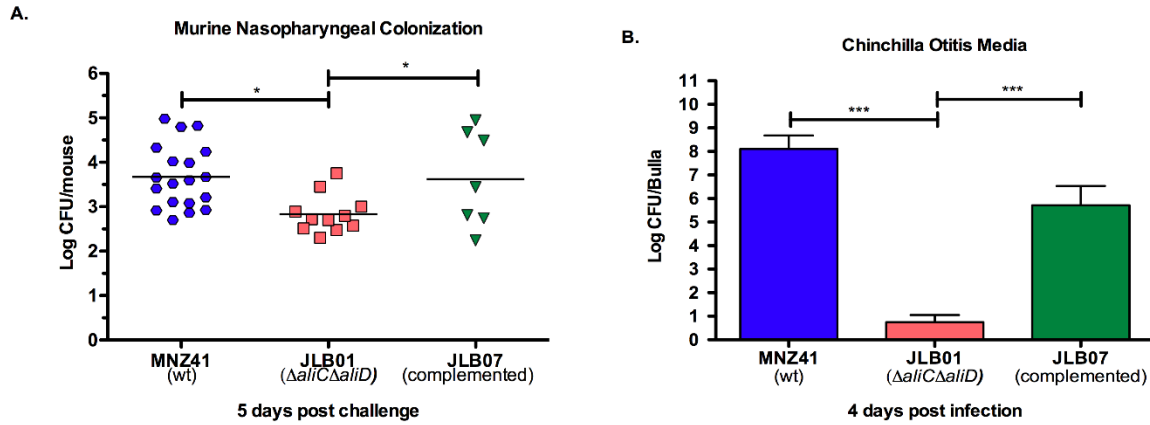

FIG S2 In vivo murine nasopharyngeal colonization and chinchilla otitis media phenotypes are restored after genetic complementation. Recovered JLB07 CFU during murine colonization at 5 days post challenge (A) and chinchilla otitis media at 4 days post infection (B) were significantly increased similar to wt levels. Data represent at least two independent studies. Error bars represent standard error of the mean. (* = $p < 0.05$, *** = $p < 0.001$)
