Table S1. Variables of interest

Variable	Comment
Age	
Gender	
Race/ethnicity	Self-reported
Marital status	
Insurance status	
Zip code	
Place of residence	Community, assisted living, nursing home
CKD etiology	Multiple etiologies allowed
Diabetes	subcategorized by evidence of microvascular complications
Hypertension	
Dyslipidemia	
Tobacco use	
Coronary artery disease	
Cerebrovascular disease	subcategorized by residual deficit and presence of hemiplegia
PVD	
Heart failure	subcategorized by LVEF if available
Valvular disease (moderate or severe)	subcategorized by valves involved and severity
Arrhythmias	subcategorized by type
Chronic lung disease	
Chronic liver disease	subcategorized by presence of cirrhosis
AIDS	
Connective tissue disorder	
Chronic debilitating neurologic disorders	
Malignancy within 5 years	subcategorized by type and metastatic status
Dementia	
Mood disorders	subcategorized by active treatment
Peptic ulcer disease/GI bleed	
Gout	
Inflammatory bowel disease	
Solid organ transplant	subcategorized by type
Non-elective hospitalization within the prior 12mo	
ER visits within past 12 months	
Blood pressure	
BMI	
Albumin	
Creatinine/eGFR	
Hemoglobin
