

S7 Figure. *uxt1Δ uxt2Δ* does not colonize extrapulmonary sites.

Brain (A) and spleen (B) CFUs of infected A/JCr mice at the time of death (for WT, *uxt1Δ*, *uxt2Δ*, and complemented mutants; n = 8) or at the indicated time points (for *uxt1Δ uxt2Δ*; n = 3). Open circles, individual mice; black bar, mean; dashed line, initial inoculum. **, $p < 0.01$ by one-way ANOVA with Tukey's post hoc test.
