

Figure S4

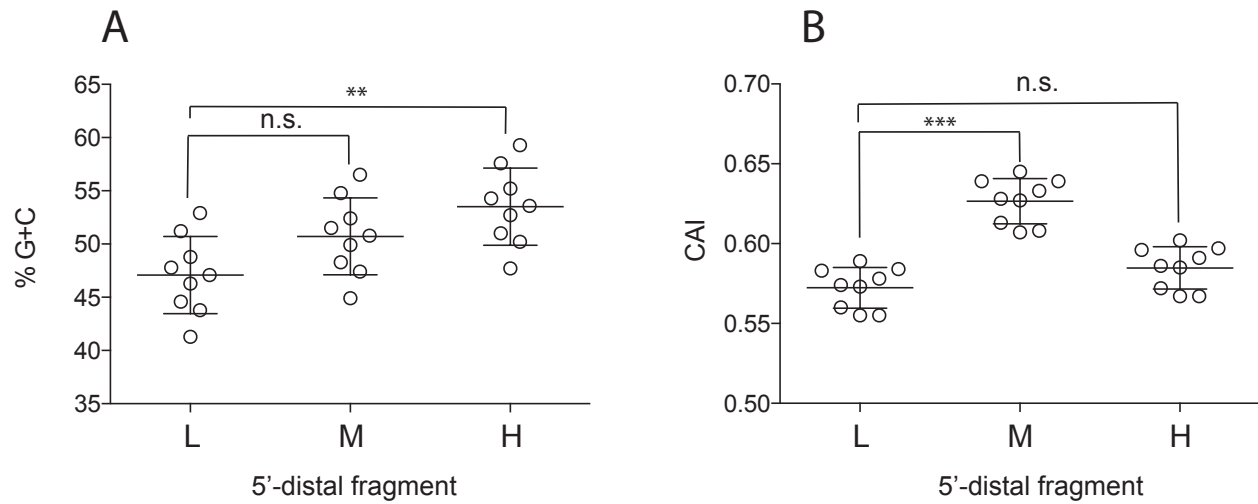

Figure S4: Comparison of overall genic GC-content (**A**) and overall genic CAI (**B**) with the GC-content of the 5'-distal fragment (L, 43% G+C; M, 53% G+C; H, 61% G+C) of the mosaic GFP genes. ** $p < 0.001$, *** $p < 0.0001$ (Mann–Whitney–Wilcoxon test).
