

Table S1. *E. coli* strains used in this study

Strains	Genotype/relevant characteristics	Source
BW25113	wild type, weak swarmer	Datsenko and Wanner, 2005
CAT	<i>flhDC:cat:flhC:motA/Cm^R</i> , used as a wild type	This study
CAT_Km ^R	Km ^R , in a wild type background	This study
CAT2	$\Delta P_{flhDC}\text{-}flhD\text{-}5'\text{-}flhC$; $P_{flhDC}\text{:}flhD\text{:}flhC\text{:}cat$ located in the <i>intS/yfdG</i> intergenic region, used as a wild type	This study
CAT_IS1	CAT strain with IS1 upstream of the <i>flhD</i> promoter	This study
CAT_IS5	CAT strain with IS5 upstream of the <i>flhD</i> promoter	This study
CAT_ΔAB	CAT, in which <i>motAB</i> is not expressed; this study nonmotile	This study
CAT_Δflic	CAT, in which <i>flic</i> is not deleted; this study nonmotile	
IS1(-107 rev)	IS1 insertion into the -107 bp position relative to the <i>flhD</i> start site (+1) in reverse orientation	This study
IS1(-120 rev)	IS1 insertion into the -120 bp position relative to the <i>flhD</i> start site (+1) in reverse orientation	This study
IS1(-180 rev)	IS1 insertion into the -180 bp position relative to the <i>flhD</i> start site (+1) in reverse orientation	This study
IS1(-214 rev)	IS1 insertion into the -214 bp position relative to the <i>flhD</i> start site (+1) in reverse orientation	This study
IS1(-415)	IS1 insertion into the -415 bp position relative to the <i>flhD</i> start site (+1) in direct orientation	This study
IS1(-469 rev)	IS1 insertion into the -469 bp position relative to the <i>flhD</i> start site (+1) in reverse orientation	This study
IS3(-199 rev)	IS3 insertion into the -206 bp position relative to the <i>flhD</i> start site (+1) in reverse orientation	This study
IS5(-99)	IS5 insertion into the -99 bp position relative to the <i>flhD</i> start site (+1) in direct orientation	This study
IS5(-99rev)	IS5 insertion into the -99 bp position relative to the <i>flhD</i> start site (+1) in reverse orientation	This study
IS5(-169)	IS5 insertion into the -169 bp position relative to the <i>flhD</i> start site (+1) in direct orientation	This study
IS5(-169 rev)	IS5 insertion into the -169 bp position relative to the <i>flhD</i> start site (+1) in reverse orientation	This study
IS5(-318)	IS5 insertion into the -318 bp position relative to the <i>flhD</i> start site (+1) in direct orientation	This study
IS5(-318rev)	IS5 insertion into the -318 bp position relative to the <i>flhD</i> start site (+1) in reverse orientation	This study

Table S2. Oligonucleotides used in this study

Name	Sequence	Use
PflhDC-Xho-F	atactcgagcttattctgtgaacctcagggtgac	Amplification of the <i>fkhDC</i> promoter
PflhDC-Rn	tgcagatcacacaaaacactcaattac	Amplification of the <i>fkhDC</i> promoter
FlhC.cat-P1	gatatttatcccacaactgctggatgaacagagagtacaggctgttaactgaaggagctaaggaa gctaaaatggag	Integration of <i>cat</i> downstream of <i>flhC</i>
FlhC.cat-P2	catcatcctccactgttgaccatgacaggatgttcagtcaggcgtaactgttaggctggag ctgcttc	Integration of <i>cat</i> downstream of <i>flhC</i>
motA-ver-R	gttagctggcgaagatctcgctctcac	Verification of <i>cat</i> integration
flhC-Xho-F	tatctcgagcggaaatgattactgcaactttccagctgcaac	Cloning the 3' region of <i>flhC</i> and the 5' region of <i>motA</i> to pKDT
motA-Bam-R	aatggatccgtattggagcgcgacgaaacacagcaacggcagc	Cloning the 3' region of <i>flhC</i> and the 5' region of <i>motA</i> to pKDT
PmotAB-P1	gaattacaacagtactgcgatgagtggcagggcgccccgtaaaggcgccatttgttaggctg gagctgttc	Integration of the 3' region of <i>flhC</i> and the <i>flhC/motA</i> intergenic region upstream of <i>motA</i>
PmotAB-P2	gtatttggagcgcgacgaaacacagcaacggcagc	Integration of the 3' region of <i>flhC</i> and the <i>flhC/motA</i> intergenic region upstream of <i>motA</i>
ycaD-P1	atcagacgcgatgcattgtctgaaagcatagacggaaatatgagttgttaggctggag ctgcttc	Insertion of <i>km'</i> gene into <i>ycaD/intS</i> intergenic region
ycaD-P2	ggtaaaaatacgcgatcccgccgggttattcgatttatattaccatataatccctcttag	Insertion of <i>km'</i> gene into <i>ycaD/intS</i> intergenic region
ycaD-ver-R	gccagagtcaacaaaaggcaggc	Verification of <i>km'</i> gene insertion into <i>ycaD/intS</i> intergenic region
Cat-Sal-R	atagtcgacattacgcggccctgccactcatc	Cloning <i>PfkhDC-fkhDC.cat</i> into pKDT
intC-P1	tgagaagggtggagtgagcgacctaacaactatcgaaatgcacaaagtctgttaggctggag ctgcttc	Integration of <i>PfkhDC-fkhDC.cat</i> into <i>intS/yfdG</i> intergenic region
intC-P2	ttcttctatcagctaataatcaaaggaaatgaagtctatcatccaagtcttcatgagaattaattccggg gatcc	Integration of <i>PfkhDC-fkhDC.cat</i> into <i>intS/yfdG</i> intergenic regions

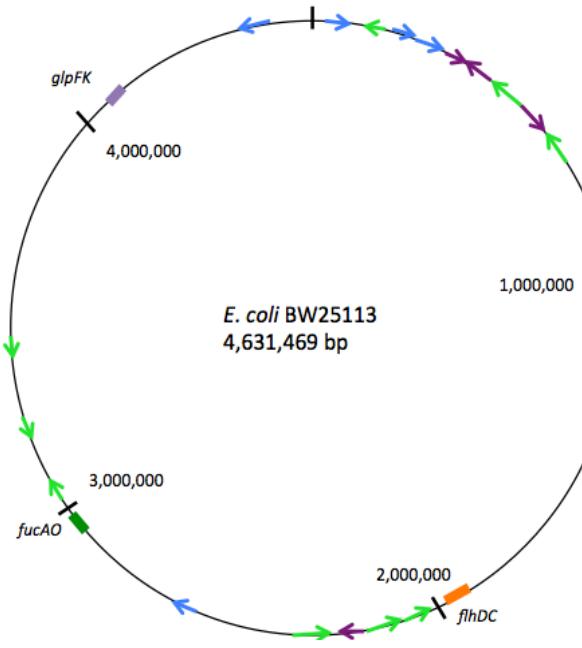

Figure S1. Original locations of relevant IS elements on the *E. coli* K12 chromosome. Figure S1

The original locations of IS elements and related genes at the beginning of this study are indicated on the *E. coli* K-12 BW25113 (GCA_000750555.1) chromosome. Green arrows correspond to IS5, purple to IS3, and blue to IS1. The heads of the arrows indicate the orientations of transcription of the transposase genes. The *flhDC* operon is located between 1972344 and 1973236 bp.
