

Table S5: Univariable exact logistic regression outputs with *Campylobacter spp.* positivity as the outcome variable, in a case-control study of 27 APN dogs and 47 control dogs from March 2015 to February 2017 in Australia.

Model	Explanatory variable	Odds ratio (OR)	SE(OR)	95% CI	P-value
1: Unadjusted	Raw chicken in diet	5.57	2.92	1.54, 19.2	0.005
2: Adjusting for case-control status	Raw chicken in diet	1.97	1.44	0.34, 10.4	0.57
