

# Prognostic significance of ST6GalNAc-1 expression in patients with non-metastatic clear cell renal cell carcinoma

## SUPPLEMENTARY FIGURES

**Supplementary Figure S1: Kaplan-Meier analyses for overall survival and recurrence free survival of patients in SSIGN/Leibovich subgroups.** Overall survival for patients in the SSIGN low risk group **A.** and high risk group **B.** according to ST6GalNAc-1 expression; recurrence free survival for patients in the Leibovich low risk group **C.** and high risk group **D.** according to ST6GalNAc-1 expression; p-value was calculated by Log rank test, p<0.05 was regarded as statistically significant.

Supplementary Figure S2: Hazard ratios for overall survival and recurrence free survival probabilities based on ST6GalNAc-1 expression levels in different SSIGN/Leibovich subgroups.
