

Description of Supplementary Files

File Name: Supplementary Data 1

Description: Information about samples, data on the multi-species comparison for processes that were identified as being consistently changed across species, AMDA-scores as well as DAC scores, data of the longitudinal analysis and shared risk SNPs between ageing diseases.

File Name: Supplementary Data 2

Description: Information about ageing-associated transcriptional changes for all considered processes, differentially regulated genes for ageing as well as disease analyses, disease alignment analyses.
