

## Appendix 1 Peer-reviewed publications from Chinese registries

We searched PubMed to identify studies conducted in mainland China that were explicitly labelled as registry study, published as a full-text article either in English or Chinese. The following search strategy was used in the PubMed database:

**((China[Title/Abstract]) OR Chinese[Title/Abstract])) AND registr\*[Title/Abstract]**  
**Filters: Humans**

Our search yielded 2604 reports, of which 338 were eligible after title and abstract screening, among some uncertain literatures reviewed by full texts.
