

S2 Table. Hospitalization day and complications after matching the level of total bilirubin

	Variable time to ERCP		<i>P</i> -value
	≤ 24 h (n = 14)	24–72 h (n = 14)	
Total bilirubin	2.7 ± 1.6		
Total length of hospital stay, days*	4.8 ± 2.8	6.9 ± 3.5	0.084
Duration of hospitalization after ERCP, days†	4.1 ± 2.8	3.2 ± 2.5	0.403
Post-ERCP complications			0.541
Cholangitis	2 (14.3)	1 (7.1)	

Variables are expressed as the mean ± SD or n (%).

*The total length of hospital stay is the duration from admission to discharge.

†The duration of hospitalization after ERCP is the duration from ERCP to discharge.
