

Region Differences in Six-Month Samples

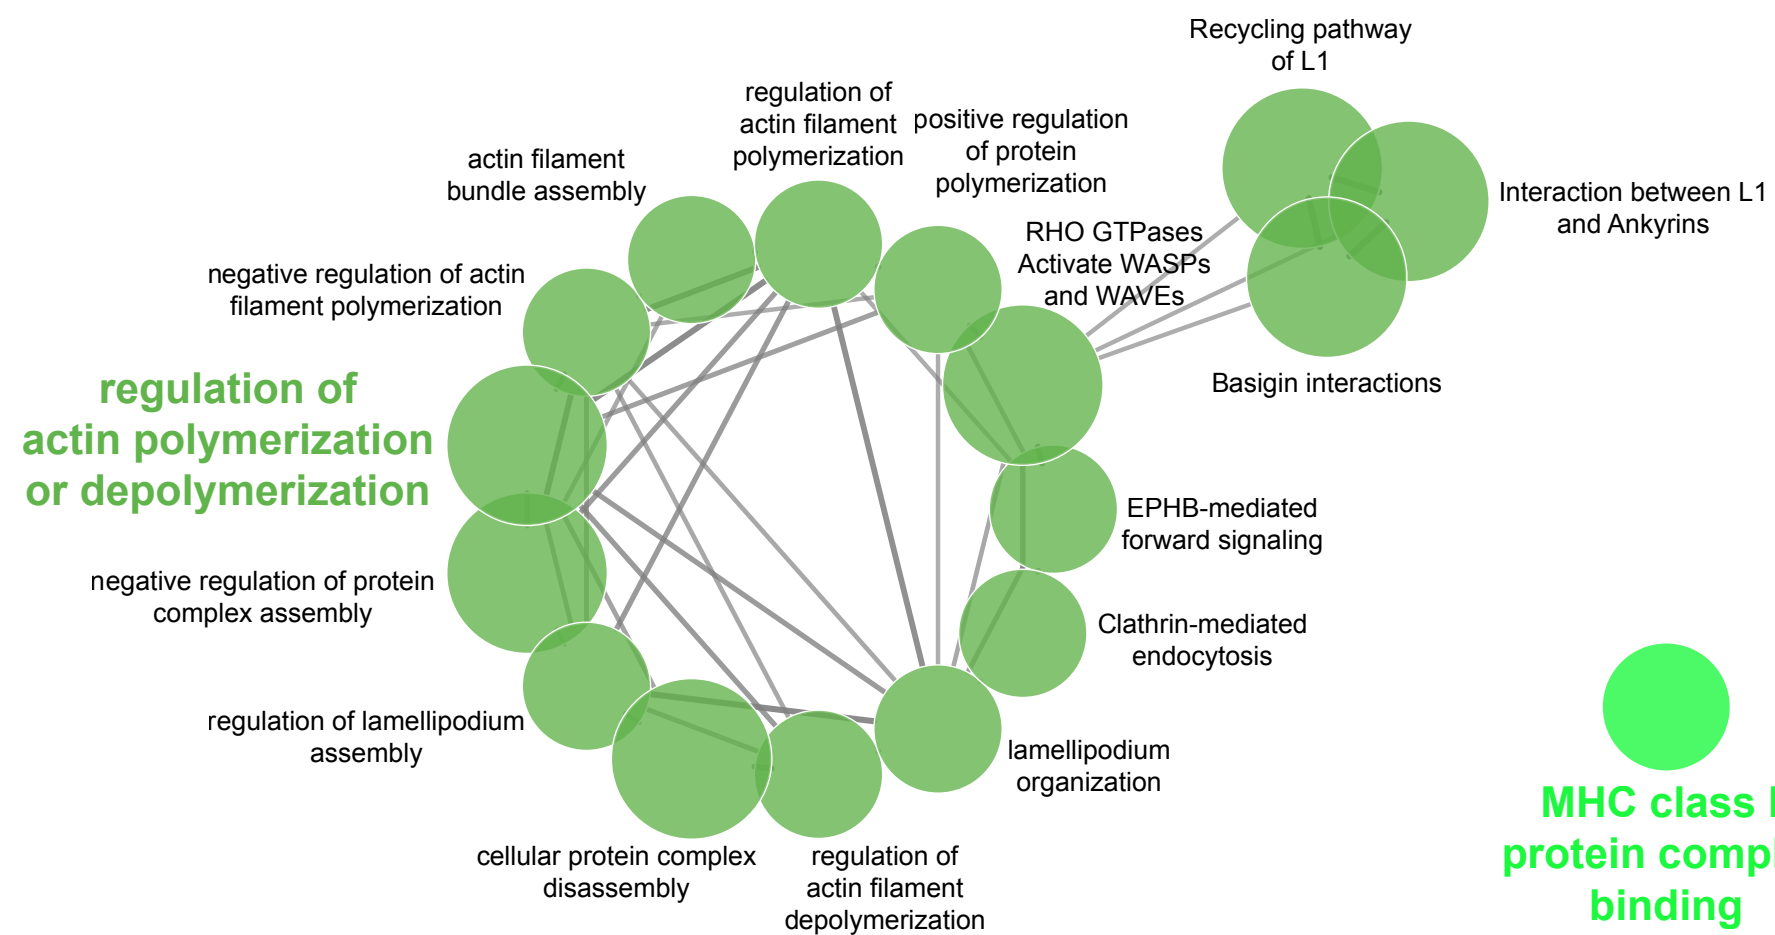

**regulation of
axon extension**

**substantia nigra
development**

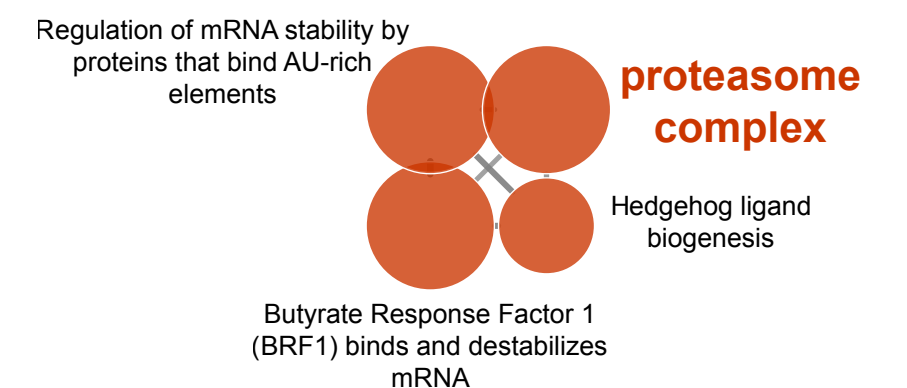

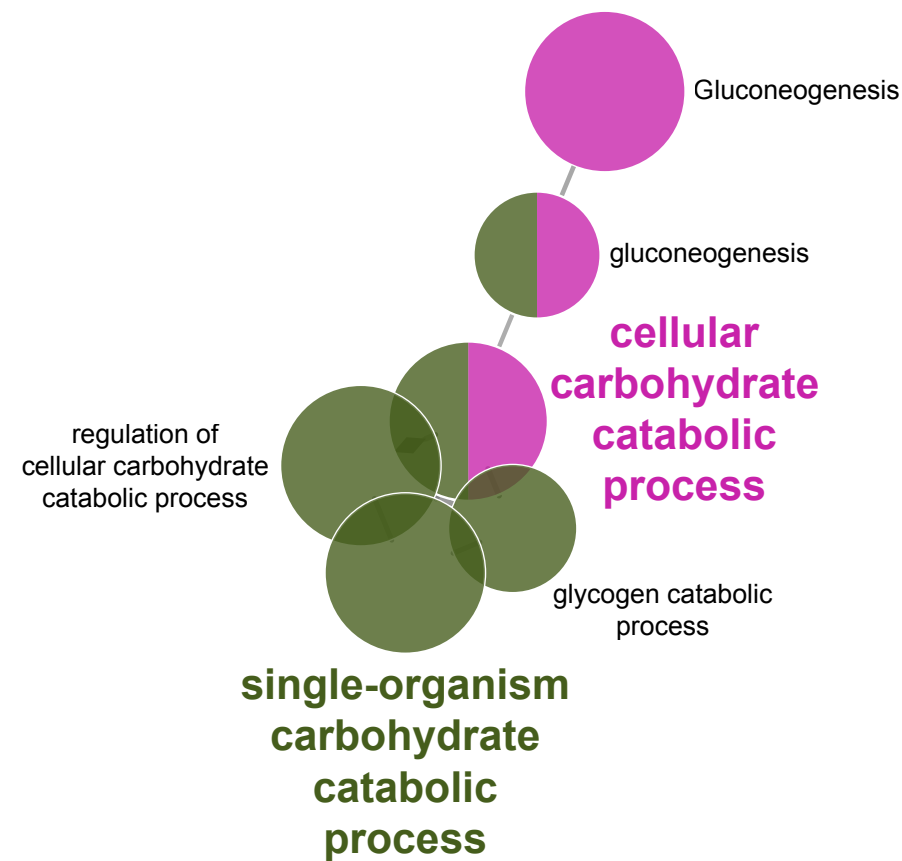

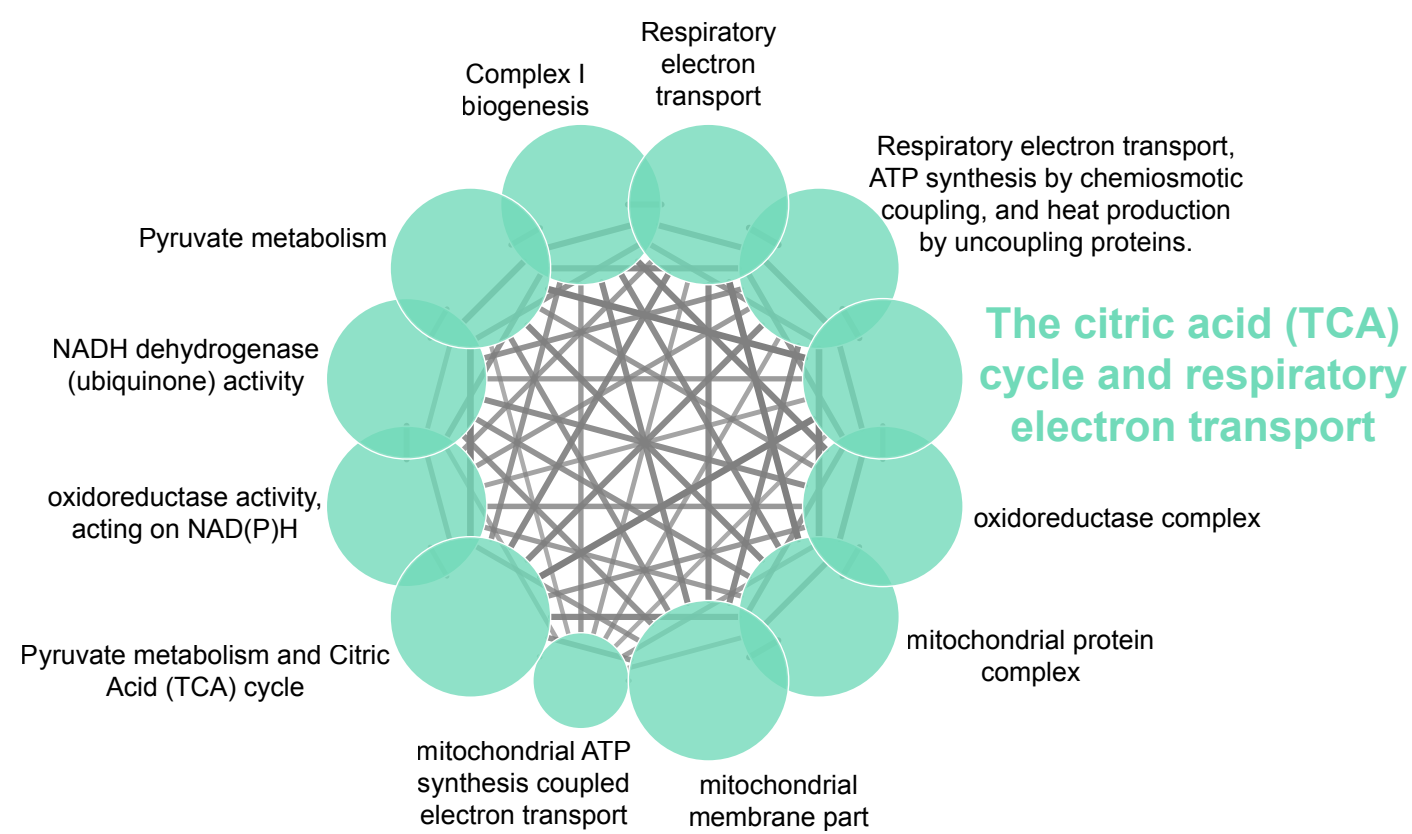

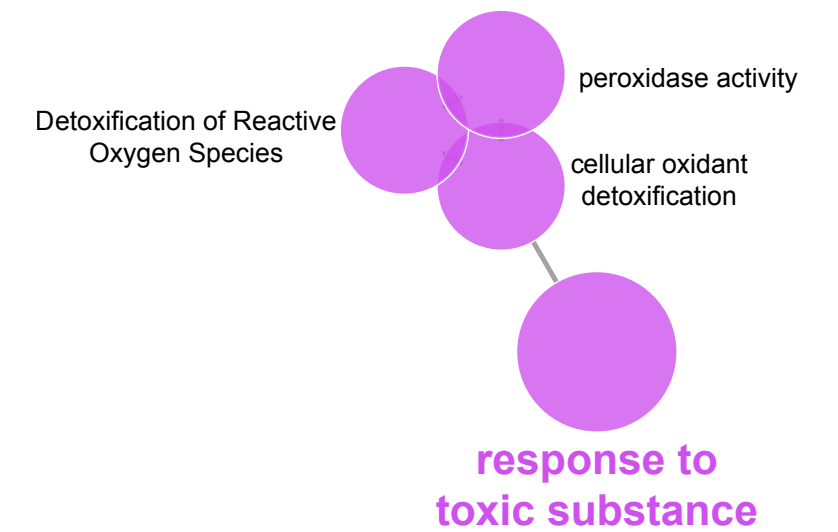

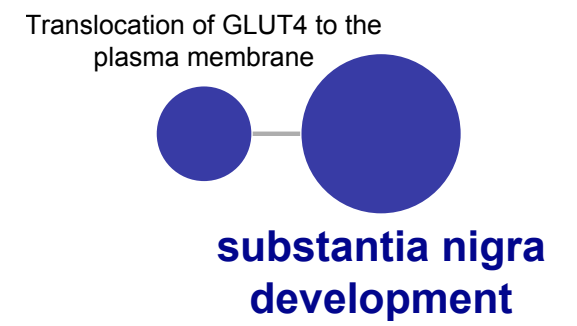

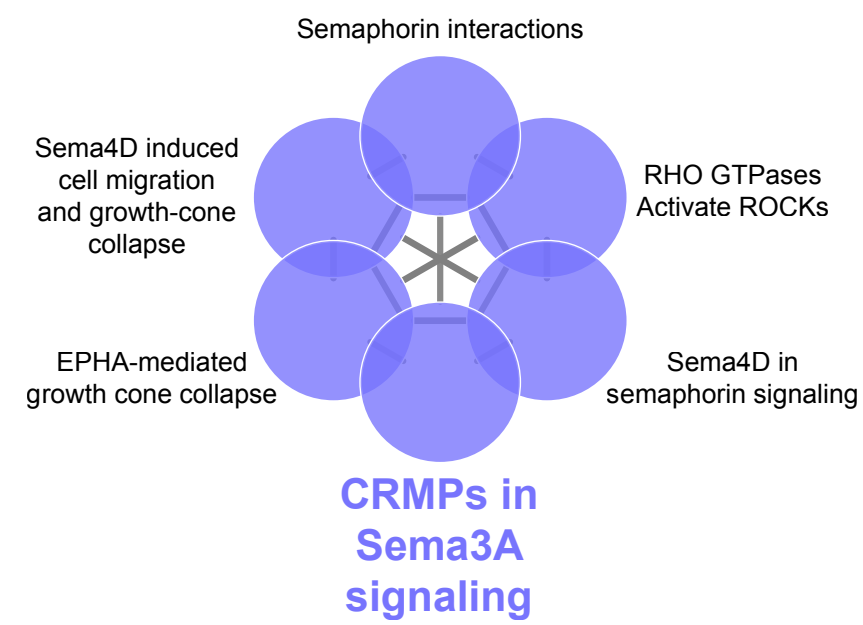

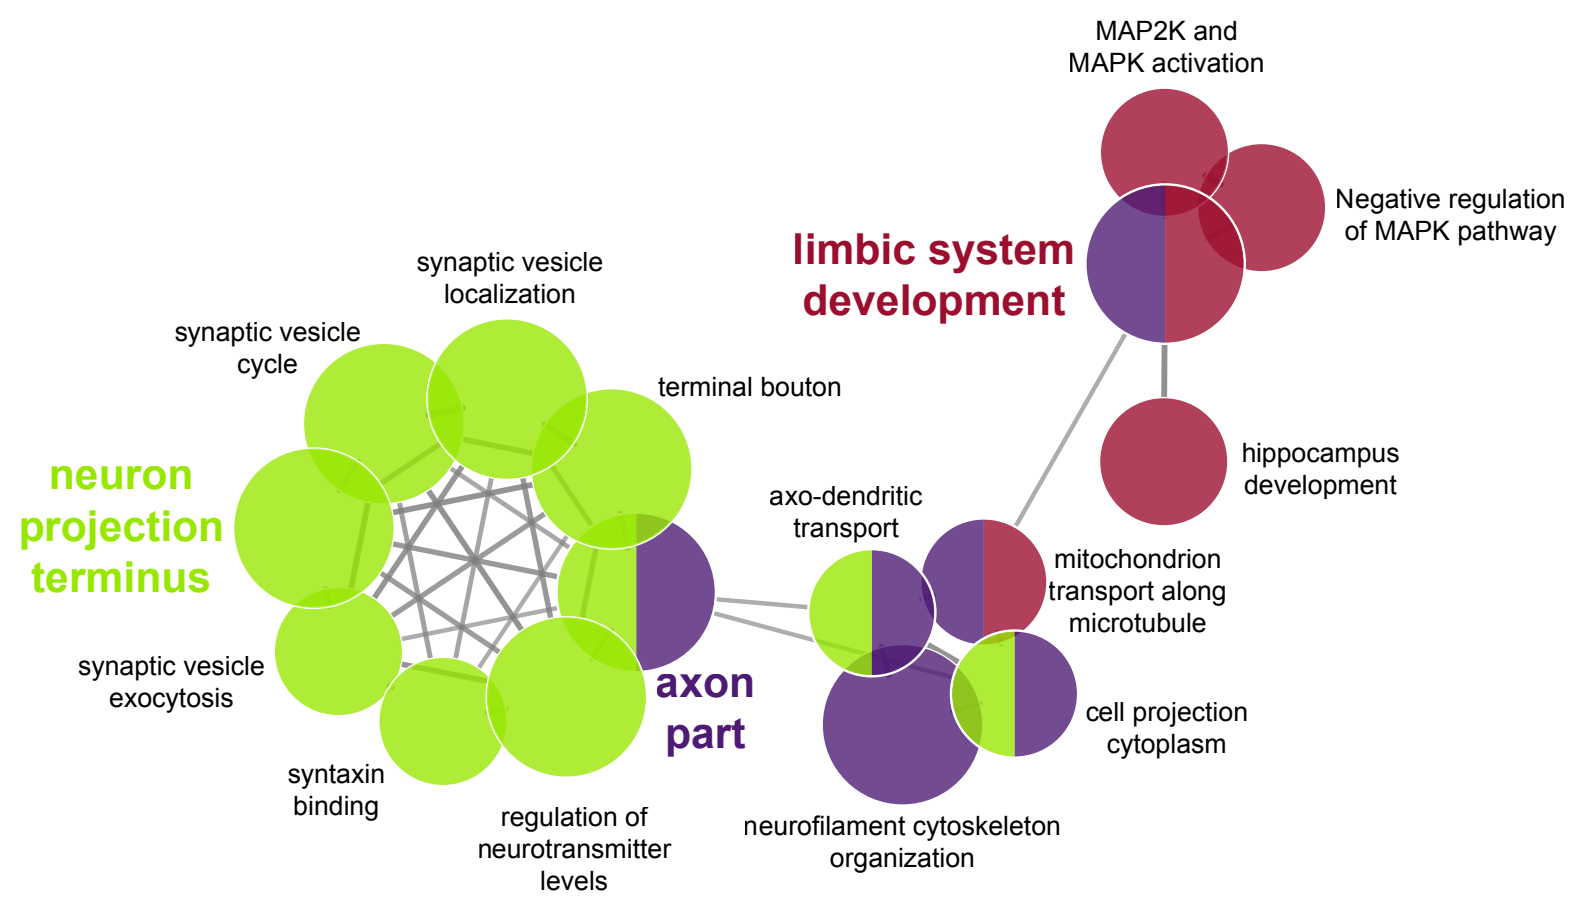

**alcohol catabolic
process**

**hydro-lyase
activity**

Region Differences in Twelve-Month Samples

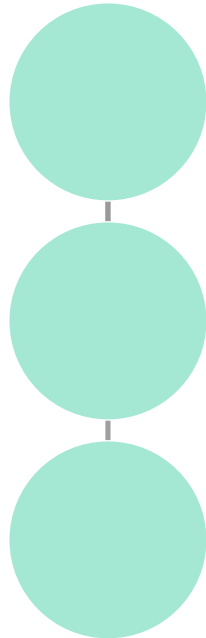

Region Differences in Disomic Samples

negative regulation of protein complex assembly

negative regulation of actin filament polymerization

regulation of actin filament depolymerization

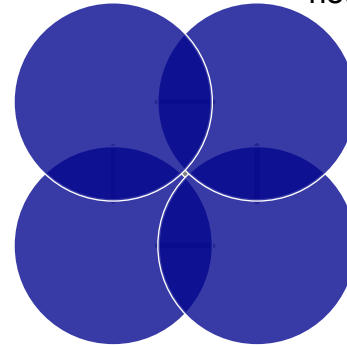

synaptic vesicle transport

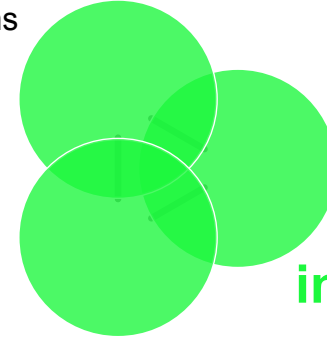

syntaxin binding

synaptic vesicle cycle

neurotransmitter secretion

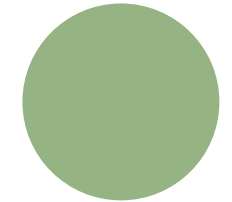

Interaction between L1 and Ankyrins

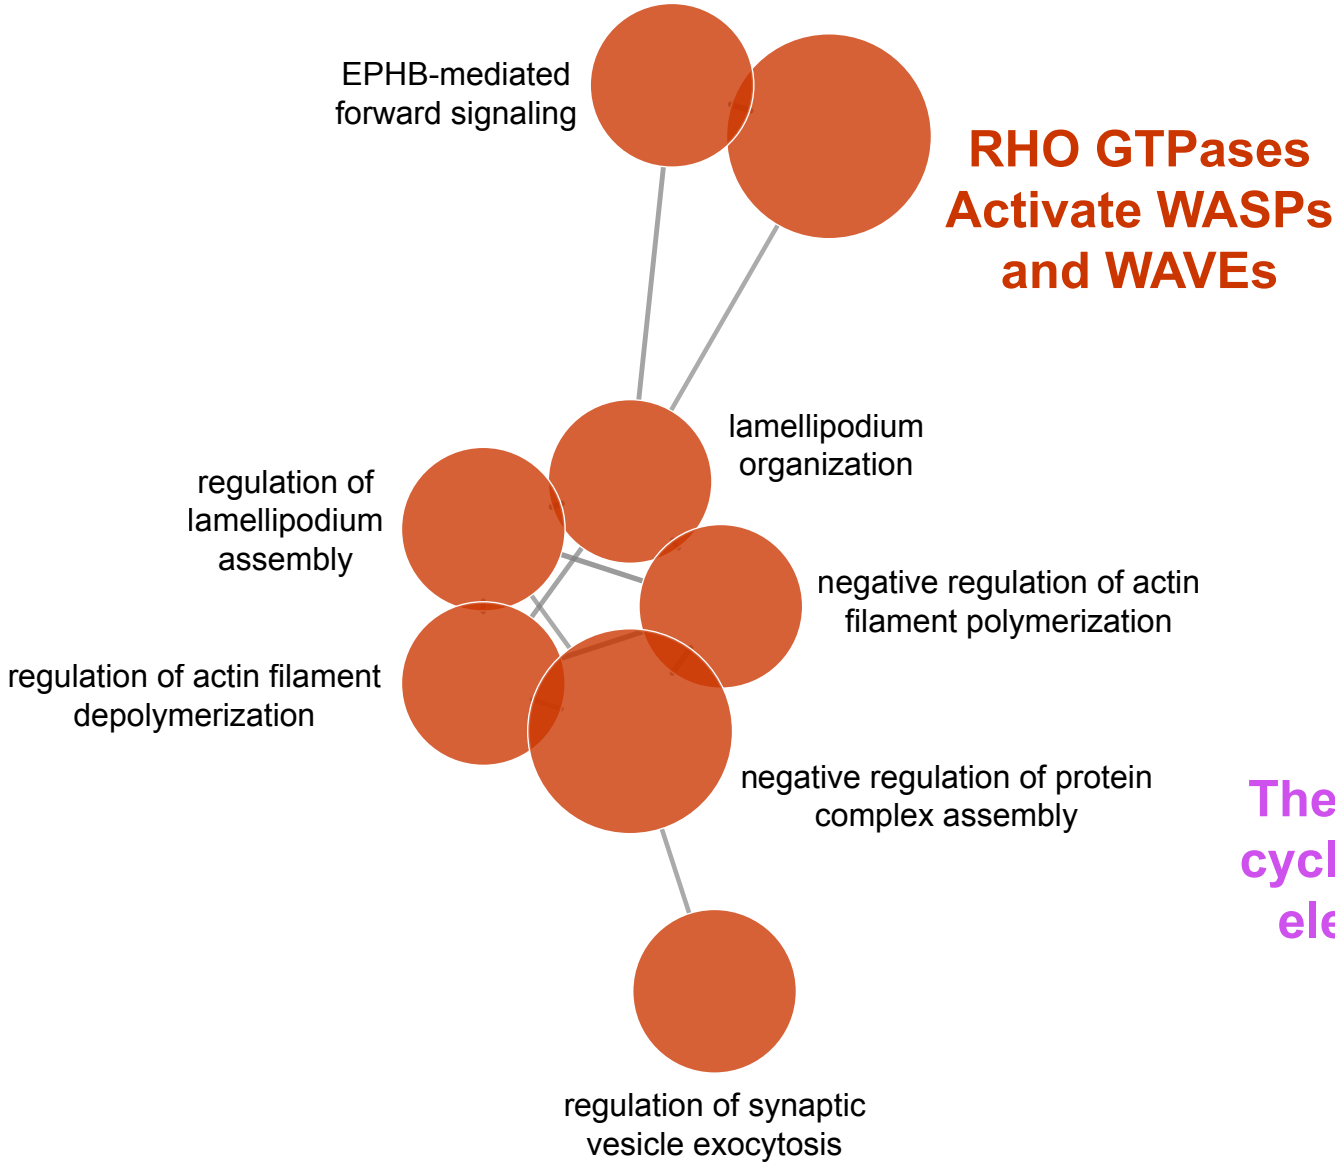

Recycling pathway of L1

Basigin interactions

CRMPs in Sema3A signaling

Region Differences in Trisomic Samples

The citric acid (TCA) cycle and respiratory electron transport
