

Supplemental Figure S3: The Expression analysis of *M. truncatula* C2H2-ZFPs in different root hairs and different nodules. The expression data were downloaded from *M. truncatula* Gene Expression Atlas database, and these genes contain 1~14 expression probeset IDs. Nod 4dpi, 4dN after rhizobial inoculation; Nod 10dpi, 10dN after rhizobial inoculation; Nod 14dpi, 14dN after rhizobial inoculation; Nod 28dpi, 28dN after rhizobial inoculation. The others are root hairs samples.
