

**Table S1.** Surgical outcomes

<b>Characteristic</b>	<b>Intervention (n=45)</b>
Anesthesia	
<i>Epidural / spinal</i>	17 (37.8%)
<i>General</i>	28 (62.2%)
Operating time (minutes)	19.5 (14-25)
Fluid deficit (milliliters)	200 (100-488)
Resection distal rim	41 (91.1%)
Coagulation niche surface	40 (88.9%)
Complications during intervention	0
Complications after intervention	
<i>PID / Endometritis</i>	1 (2.2%)
Ambulant treatment	45 (100%)

*Data are reported as 'n (valid percentage)' or as 'median (IQR)'.*
