

Supplementary Figure 1. Consort Diagram of ID vs PO vs ID+PO BCG Comparative Trial

Supplementary Figure 2. Lymphoproliferative and IFN- γ ELISPOT Responses in all Subjects

* $p < 0.05$ by Mann-Whitney U test comparing post-vaccination time points with D0

* $p < 0.05$ by Wilcoxon Matched Pairs test comparing post-vaccination time points with D0

Supplementary Figure Legend

Supplementary Figure 1. Consort Diagram of main ID vs PO vs ID+PO comparative trial.

Supplementary Figure 2. Lymphoproliferative and IFN- γ ELISPOT responses in all subjects. The lymphoproliferative (A.) and IFN- γ ELISPOT (B.) assays were completed as in Figures 2 and 3, respectively. Mean values \pm SE are shown for each time point. * $p < 0.05$, ** $p < 0.01$ by Wilcoxon matched pairs testing compared with pre-vaccination responses.
