

Supl. Figure 1 MPs and Exos exert immunosuppressive function on T lymphocyte subsets. Representative images of CD8⁺IFN- γ ⁺ cytotoxic T cells, CD4⁺IFN- γ ⁺ Th1 cells, CD4⁺IL-10⁺ Tr1 cells and CD4⁺CD25⁺Foxp3⁺ Treg cells in splenocytes (n=4) when incubated alone (Ctrl) or with naïve MSCs (MSCs) or with 25 ng of Exos or MPs by flow cytometry analysis.

Supl Figure 1
