

Description of Supplementary Files

File Name: Supplementary Data 1

Description: Replication of variants with suggestive association with aortic stenosis in Iceland.

File Name: Supplementary Data 2

Description: Association of aortic stenosis variants with other cardiovascular phenotypes.

File Name: Supplementary Data 3

Description: Association of aortic stenosis variants with traditional cardiovascular risk factors.

File Name: Supplementary Data 4

Description: The effect of established coronary artery disease (CAD) variants on CAD and aortic valve stenosis (AS).

File Name: Supplementary Data 5

Description: The effect of established coronary artery disease (CAD) variants on aortic valve stenosis (AS) in Iceland and UK-Biobank.

File Name: Supplementary Data 6

Description: The association of CAD genetic risk score with aortic valve stenosis.

File Name: Supplementary Data 7

Description: Association of reported aortic root size variants on aortic valve stenosis.
