<i>S. anginosus</i> str. UMB0050	
<i>S. anginosus</i> str. UMB0839	
<i>Streptococcus</i> sp. str. UMB0767	
<i>S. dentisani</i> str. UMB0079	
<i>S. dentisani</i> str. UMB0832	
<i>S. mitis</i> str. UMB0079	
<i>S. mitis</i> str. UMB1341	

**Table S1.** Clusters of bladder isolates containing phage sequences with sequence similarity.

**Fig. S1. Average number of lower confidence phage sequences per genome isolated from Control and OAB patients. Genera with representatives from both patient populations are shown.**
