

Supplemental Figure S2. Scrambled ZFX motifs are not enriched at ± 240 bp of the TSS. Shown is the frequency at which the ETS motif GGAAGT, as an example of a known motif for a TF other than ZFX that binds to promoter regions (A), scrambled ZFX motif 1 (B), scrambled ZFX motif 2 (C), or scrambled ZFX motif 3 (D) are located ± 2 kb from the TSS of CpG island promoters, of non-CpG island promoters, of CpG island promoters bound by ZFX, and of CpG island promoters not bound by ZFX.
