Protocol

Amendments

October 31, 2016: We have changed the prescription-based definition to include the zoster-specific tablet doses only (acyclovir in 800 mg tablet dose in packages with 35 pills or a 500 mg tablet dose of valacyclovir or famciclovir) in the main analysis (instead of as a sensitivity analysis). This change is based on preliminary data from an ongoing Danish validation study, which suggests that the algorithm including only the zoster-specific tablet doses is more specific than the broader definition including all tablet doses.

Protocol

BACKGROUND

Herpes zoster (HZ) is a frequent neurocutaneous disease caused by reactivation of varicella zoster virus (VZV), which lies latent in the sensory ganglia after the primary infection chickenpox.^{1,2}

Reactivation occurs when the cell-mediated immunity towards VZV wanes below a certain critical level. Accordingly, the risk of HZ is increased among elderly because of immunosenescence, among patients with inherited cell-mediated immunodeficiency, and among patients with immunosuppression acquired by drugs (*e.g.*, patients receiving corticosteroids or chemotherapy), radiotherapy, viral infections (*i.e.*, human immunodeficiency virus [HIV]), or malignancy.^{2,3}

Psychological stress is associated with activation of the hypothalamic-pituitary-adrenal axis and thereby suppression of the immune system,⁴⁻⁶ which could in turn increase the risk of HZ. For example, it has been demonstrated that VZV-specific cell-mediated immunity is reduced in patients with major depression⁷ and correlates negatively with severity of depressive symptoms.⁸ Furthermore, the immunological response to the zoster vaccine is reduced in patients with untreated depression compared with individuals treated with antidepressants and individuals without depression.⁹ Data on the association between psychological stressors other than psychiatric diagnoses and HZ are lacking.

Bereavement of a spouse or partner is considered one of the most stressful life events.¹⁰ However, only four studies have examined spousal bereavement as a risk factor for HZ, showing conflicting results.¹¹⁻¹⁴ Comparison of the studies is hampered by study limitations and differences in methods used. First, previous studies may have been affected volunteer bias.¹²⁻¹⁴ Second, various exposure windows and definitions have been employed by grouping spousal death together with other catastrophic health events in a spouse,¹¹ other spousal events (divorce, separation or marriage),¹³ or other negative life events (*e.g.* health troubles or becoming unemployed).^{12,15} Third, exposure definitions may have been prone to misclassification of spousal death due to recall

Protocol

bias,^{12,13,15} lack of interviewer blinding,^{12,13} or use of claims data to identify spousal events.¹¹

Finally, studies have been limited by small study size^{11-13,15} and only one study performed detailed analysis according to timing of the life event.¹¹

OBJECTIVE

The objective of this study is to examine whether experiencing the death of a partner is associated with an increased risk of herpes zoster. Specifically, we will examine whether the association varies with time since bereavement, underlying immunosuppression, and diagnosis of depression/anxiety.

MATERIAL AND METHODS

Setting and design

We will conduct this study in Denmark, which has a population of approximately 5.6 million inhabitants. The Danish welfare system guarantees unfettered access to hospitals and general practitioners, as well as reimbursement of medication to various degrees.¹⁶ Healthcare services provided are registered in various databases using the unique central personal register (CPR) number assigned to all residents at birth or upon immigration.¹⁶ This study will be designed as a density case-control study using such databases. The study period will commence on January 1, 1997 with continuation until December 31, 2013, which ensures at least two years of prescription history for all study participants. All registry codes for the study are provided in the Supplementary Table S1.

Data sources

The Danish National Patient Registry (DNPR) records data for the Danish hospital sector, including data on all admissions to non-psychiatric hospitals with nationwide coverage since 1978,

Protocol

admissions to psychiatric wards since 1994, and visits to all outpatient hospital-based specialty clinics and emergency rooms since 1994.¹⁷ Each registry record includes data pertaining to the patient (e.g. CPR number), dates of admission and discharge or start and end of outpatient follow-up, procedures, the primary diagnosis, and one or more secondary diagnoses.¹⁷ Diagnoses are classified according to the *International Classification of Diseases*, 8th revision (ICD-8) until the end of 1993 and the 10th revision (ICD-10) thereafter. Surgical procedures are coded according to a Danish classification (1977 through 1995) and a Danish version of the Nordic Medico-Statistical Committee (NOMESCO) Classification of Surgical Procedures (from 1996 on). General practitioners and practicing specialists do not report to the DNPR.

The Danish Psychiatric Central Research Register (PCRR) collects data on all admissions to psychiatric departments since 1970 and on outpatient treatment and emergency room contacts since 1995.¹⁸ The registry structure resembles that described for the DNPR, providing data on relevant dates and diagnosis codes for each hospital contact.¹⁸

The Danish National Prescription Registry provides information on computerized prescription drugs since 1995.¹⁹ Each time a prescription is redeemed at the pharmacy, the patient's CPR number, the date, and the type and quantity of drug redeemed is recorded in electronically for the database.¹⁹ The type of drug is registered according to World Health Organization's *Anatomical Therapeutic Chemical Classification System*. Indication codes for treatment are available since 2004, but are used inconsistently (73% complete in 2012) and can be too unspecific for use in research.

The Danish National Diabetes Register includes data on diabetic patients since 1995.²⁰ The registry population is identified using an algorithm that combines diagnostic data from the DNPR, blood-glucose measurements from the National Health Service Register, prescriptions for anti-

Protocol

diabetics according to the Danish National Prescription Registry, and civic data from the Civil Registration System.²⁰

The Civil Registration System data on age, sex, address, and vital statistics for the entire population since 1968.¹⁶ The registry also contains data on civil status (single, married, divorced, widow or widower, registered partnership, or dissolved registered partnership), CPR number of spouse or registered partner, and CPR numbers of children. As of 1989, information in the Civil Registration System is updated daily.

Linkage of all registries will be performed on the secure servers at Statistics Denmark, the central authority on Danish statistics, which collects, processes, and publishes information relating to the Danish society. Statistics Denmark also collects data from Danish education registers, such as the Population Education Register,²¹ which was included in the present study.

Herpes zoster

Cases will be defined through two sources:

- 1) DNPR: all patients with a first-time hospital diagnosis (inpatient, outpatient, emergency room) of HZ during 1997 through 2013. For inclusion of cases with hospital diagnosis of HZ (see Table below for codes), we will only consider those with a first-listed (primary=A) diagnosis of HZ (to avoid including long-term complications with inaccurate diagnosis date of primary HZ). The date of admission or start of outpatient follow-up will be considered the diagnosis date. We will restrict to patients aged 18 years or older because of differences in the epidemiology of HZ in children and adults.
- 2) The Prescription Registry: all individuals aged ≥ 40 years with a first-time prescription record for acyclovir, valacyclovir or famciclovir during 1997 through 2013.

Protocol

Codes used to identify case population (all sub-codes included unless otherwise stated)

Herpes zoster

Hospital diagnosis (DNPR)	ICD-8: 053; ICD-10: B02, H03.1F, H13.1M, H19.0D, H19.2D, H19.2J, H22.0C, H62.1B, G05.1I, G05.1M
Treatment in general practice (Prescription Registry)	
Acyclovir	ATC: J05AB01 (HZ-specific dose: 800 mg in packages of 35 tablets)
Valacyclovir	ATC: J05AB11 (HZ-specific dose: 500 mg)
Famciclovir	ATC: J05AB09 (HZ-specific dose: 500 mg)
Postherpetic neuralgia (PHN)	ICD-10: G530 or B022 (if specifically coded, if B02 is coded without further specification it is not defined as PHN)

We will only consider patients with no previous codes for HZ or PHN in the DNPR (ICD codes in any position (inpatient, outpatient, emergency room, primary and secondary diagnoses) or the Prescription Registry (ATC codes). Thus, if the earliest mention of HZ in the data is a secondary 053, B02 or H03.1F, H13.1M, H19.0D, H19.2D, H19.2J, H22.0C, H62.1B, G05.1I, G05.1M code in DNPR or a primary or secondary PHN code, we will exclude the patient from the case population and the person will no longer be at risk of HZ (that is, not eligible as a control either).

The date of diagnosis (DNPR) or prescription (Prescription Registry), whichever comes first, will be considered the index date for HZ cases.

Population Controls

We will use the Civil Registration System to individually match up to 4 population controls to each HZ case by age (± 2 months) and sex. We will sample controls using risk-set sampling; that is, only individuals alive and with no previous primary or secondary diagnosis of HZ or PHN (ICD-8: 053; ICD-10: B02, G530) and no previous HZ related prescription (ATC: J05AB01, J05AB11, J05AB09) ever before the index date of the case will be eligible for inclusion. Controls will be assigned an index date identical to that of their case.

Protocol

Partner bereavement

We will use the Civil Registration System to retrieve information on marital status, corresponding partner, and all partner deaths for cases and controls prior to the index date. Partners will be identified using an algorithm developed by Statistics Denmark. From the DNPR, we will ascertain the entire hospital diagnosis history for deceased partners at one month before their date of death and compute their age-adjusted Charlson Comorbidity Index (ACCI)²² as a proxy measure of whether the death of the partner was unforeseen. The original Charlson Comorbidity Index assigns 0 to 6 points to a range of chronic diseases according to their ability to predict death.²² In the age-adjusted index points are also given according to age (1 point: 50-59 years; 2 point: 60-69 years; 3 points: 70-79 years; 4 points: 80-89 years; 5 points: 90-99 years).²² The codes used for the index are shown below. Based on the total ACCI score, we will group study participants into three categories of risk of partner death: lowest risk (0–3 points), intermediate risk (4–6 points), or highest risk (≥ 7 points).

The age-adjusted Charlson Comorbidity Index

Score 1

Myocardial infarction	ICD-8: 410; ICD-10: I21, I22, I23
Congestive heart failure	ICD-8: 427.09, 427.10, 427.11, 427.19, 428.99, 782.49; ICD-10: I50, I11.0, I13.0, I13.2
Peripheral vascular disease	ICD-8: 440, 441, 442, 443, 444, 445; ICD-10: I70, I71, I72, I73, I74, I77

Covariates

Using the DNPR, the Prescription Registry, and the Danish National Diabetes Registry, we will identify previous records of: rheumatoid arthritis, systemic/subacute lupus erythematosus, inflammatory bowel disease, chronic obstructive pulmonary disease, asthma, diabetes (type I, type II, or unknown type), chronic kidney disease (chronic kidney disease stage 3 or higher, renal failure, chronic uraemia, dialysis or renal transplantation), human immunodeficiency virus infection, haematopoietic stem cell or bone marrow transplantation, solid organ transplantation (excluding renal transplants), or other cellular immune deficiency at any time before index date; leukaemia, lymphoma or myeloma within two years before the index date; and prescription records for oral glucocorticoids, other immunosuppressant drugs, or inhaled glucocorticoids within 90 days before the index date. For chronic obstructive pulmonary disease, we will include diagnoses of chronic

Protocol

bronchitis and emphysema and required that patients were aged 35 years or older at first diagnosis. To capture active asthma, we will require that patients with a record of asthma also have an asthma-related prescription within the year before index date. Asthma patients are also required not to be classified as having chronic obstructive pulmonary disease. Diabetes will be identified using the Danish National Diabetes Registry. For descriptive purposes, we aimed to classify the type of diabetes as type I, type II, or unknown based on information on age at first record, age at first treatment and type of treatment. We will define type I diabetes as (1) age at first diagnosis ≤ 35 years and exclusive treatment with insulin prior to index date or (2) ≥ 2 insulin prescriptions at age ≤ 35 years but no diabetes diagnosis. Type II diabetes was defined as (1) age at first diabetes diagnosis > 35 years or (2) exclusive treatment with oral anti-diabetics at age > 35 years. We will classify remaining patients with diabetes as having unknown type.

We will also categorize educational level based on highest achieved education at index date as short (≤ 10 years), medium ($> 10-15$ years), or long (> 15 years). Educational level is included as a measure of socioeconomic status, which may be associated with health-seeking behavior.

We hypothesize that psychiatric disease, particularly depression and anxiety, may partly mediate the association between partner bereavement and HZ. We will therefore identify recent history of depression or anxiety, which we define as a diagnosis of depression, diagnosis of anxiety, or use of antidepressants within the past 90 days. We will exclude tricyclic antidepressant prescriptions among the antidepressants, because the competing indications insomnia and/or pain.

Code lists for all covariates are presented in the Appendix.

Statistical analysis

In the following, each step of the statistical analyses is described:

Protocol

- 1) We will produce descriptive statistics for all variables, including exposure. We will also stratify further by partner bereavement (overall and within 30 days before index date). With this information we can produce Table 1 and Appendix Table e1.

Table 1. Characteristics of herpes zoster cases and matched controls, Denmark, 1997–2013

	Cases (n=)	Controls (n=)
Total	x (x.x%)	x (x.x%)

Other immunosuppressive treatment	x (x.x%)	x (x.x%)

For presentation in text also compute:

- Median (interquartile range) of age.
- Partner status
- Highest achieved education

Protocol

Highest achieved education (DK)		
Short	x (x.x%)	x (x.x%)
Medium	x (x.x%)	x (x.x%)
Long	x (x.x%)	x (x.x%)
Missing	x (x.x%)	x (x.x%)
Civil status		
Partner	x (x.x%)	x (x.x%)
No partner	x (x.x%)	x (x.x%)
Recently bereaved*	x (x.x%)	x (x.x%)

*Civil status is updated 1st of January each year. Thus, a person carries the civil status from January to the end of the year. For persons who loose their partner (bereaved persons) in the index year, we will not be able to know if a person is single or has already found a new partner. Thus a category for “recently bereaved” is included showing if a person was bereaved within the last year.

Supplementary Table e1. Characteristics of herpes zoster cases and matched controls, Denmark, 1997–2013, by previous partner bereavement (yes/no)

2) We will use conditional logistic regression to compute unadjusted odds ratios (ORs) with 99% confidence intervals (CIs), associating partner bereavement with HZ. We will then fit a multivariable conditional logistic regression model with adjustment for HZ risk factors. We will perform analyses overall and by time between bereavement and index date. The reference group for all analyses will be persons who have not previously experienced partner death. From this we can produce Table 2.

Table 2. Odds ratios for the association between partner bereavement and herpes zoster

>1095 days	

*Adjusted for rheumatoid arthritis, lupus erythematosus, inflammatory bowel disease, asthma, chronic kidney disease, diabetes, inhaled corticosteroids, solid organ transplantation, HIV infection, leukaemia, lymphoma, myeloma, hematopoietic stem cell/bone marrow transplantation, Other unspecified cellular immune deficiencies, oral glucocorticoids, other immunosuppressive treatment.

Protocol

6) Finally, we will perform two sensitivity analyses to examine the robustness of our prescription-based definition of HZ. In a stepwise manner, we will aim to increase the positive predictive value of our algorithm by making it more and more restrictive by each step. After each step, we will compute the adjusted odds ratio, to assess the effect of the increasing restriction. The steps are as follows:

- First, we will restrict to those with prescriptions for acyclovir in 800 mg tablet-dose in packages with 35 pills, valacyclovir in 500 mg tablet-dose, or famciclovir in 500 mg tablet-dose. This will be done by using the specific product number for the agents, which are:

Treatment in general practice (Prescription Registry)	VNR (Varenummer)
Acyclovir (J05AB01), 800 mg in packages of 35 tablets	005404, 007109, 044597, 057554, 078015, 082158, 106864, 397653, 434183, 447144, 470021, 480533, 496455, 515258, 516328, 560359
Valacyclovir (J05AB11), 500 mg	All VNR for the ATC code except for 030449, 172940, 447695, 498063, 534343
Famciclovir (J05AB09), 500 mg	088196, 455584, 494756, 550906

- Second, we will also restrict to cases with indication codes explicitly stating HZ (INDO 0000135 and 0000314):.
- Third, we will also restrict the analysis to those diagnosed in 2000 or later to ensure a prescription history of at least five years for ascertaining first-time prescription for antiviral drug and covariates.

Table e6. Sensitivity analysis testing the robustness of the prescription-based definition of herpes zoster in Danish data.

	Adjusted odds ratio (99% confidence interval)*		
	Step 1. Restricting to herpes zoster specific doses	Step 2. Restricting to those with indication codes explicitly stating herpes zoster	Step 3. Restrict study period to 2000 or later.
No previous partner bereavement

Protocol

Lymphoma

DC81	Hodgkin lymfomer
DC810	Nodulært lymfocydomineret Hodgkin lymfom
DC811	Klassisk Hodgkin lymfom med nodulær sklerose
DC812	Klassisk Hodgkin lymfom med blandet cellularitet
DC813	Lymphoma Hodgkin 'lymphocytic depletion'
DC814	Klassisk lymfocytrigt Hodgkin lymfom
DC817	Andet klassisk Hodgkin lymfom
DC819	Hodgkin lymfom UNS
DC82	Follikulære lymfomer
DC820	Follikulært lymfom, grad I
DC821	Follikulært lymfom, grad II
DC822	Follikulært lymfom, grad III
DC825	Diffust follikelcenter lymfom
DC826	Kutant follikelcenter lymfom
DC827	Andet follikulært lymfom
DC829	Follikulært lymfom UNS
DC83	Ikke-follikulære lymfomer
DC830	Småcellet B-celle lymfom
DC830B	Lymfoplasmacytært lymfom
DC830C	Nodalt marginalzonelymfom
DC830D	Splenisk marginalzonelymfom
DC831	Mantelcelle lymfom
DC831A	Centrocytisk lymfom
DC831B	Malign lymfomatøs polypose
DC832	Lymph mal non-Hodg af diff type mixed small and large cell
DC833	Diffust storcellet B-celle lymfom
DC833A	Anaplastisk diffust storcellet B-celle lymfom
DC833B	CD30-positivt diffust storcellet B-celle lymfom
DC833C	Centroblastært diffust storcellet B-celle lymfom
DC833D	Immunoblastært diffust storcellet B-celle lymfom
DC833E	Plasmablastært diffust storcellet B-celle lymfom
DC833F	T-cellert diffust storcellet B-celle lymfom
DC834	Lymphoma mal non-Hodgkin af diffus immunoblastær type
DC835	Lymfoblastært lymfom
DC835A	Lymfoblastært B-celle lymfom
DC835B	Lymfoblastært T-celle lymfom
DC835C	Lymfoblastært lymfom UNS
DC836	Lymphoma mal non-Hodgkin af diffus udifferentieret type
DC837	Burkitt lymfom
DC837A	Atypisk Burkitt lymfom
DC837B	Burkitt-lignende lymfom
DC838	Andet ikke-follikulært lymfom
DC838A	Primært effusionslymfom (af B-celle type)
DC838B	Intravaskulært storcellet B-celle lymfom
DC839	Ikke-follikulært (diffust) lymfom UNS

Protocol

DC84	Modne NK/T-celle lymfomer
DC840	Mycosis fungoides
DC840A	Mycosis fungoides associeret med follikulær mucinose
DC840B	Pagetoid retikulose
DC840C	Granulomatøs slack skin (lymphoma malignum)
DC841	Morbus Sézary
DC842	Lymphoma mal T-zone
DC843	Lymphoma mal lymfoepiteloidt
DC844	Perifert T-celle lymfom UNS
DC844A	Storcellet Pleomorft CD30+ T-celle lymfom
DC844B	Storcellet Pleomorft CD30- T-celle lymfom
DC844C	Storcellet immunoblastisk CD30+ T-celle lymfom
DC844D	Storcellet immunoblastisk CD30- T-celle lymfom
DC844E	Middel-småcellet pleomorft T-celle lymfom
DC844F	Lymfoepiteloidt lymfom
DC844H	Modent T-celle lymfom UNS
DC845	Andet modent NK/T-celle lymfom
DC845A	Storcellet anaplastisk CD30+ T-celle lymfom
DC845B	Storcellet anaplastisk CD30+ T-celle lymfom, primært i huden
DC845C	Subkutant pannikulitrelateret T-lymfom
DC845D	Angiocentrisk T-/NK-celle lymfom
DC846	Anaplastisk storcellet lymfom, ALK-positivt
DC846A	Anaplastisk storcellet lymfom, CD30-positivt
DC847	Anaplastisk storcellet lymfom, ALK-negativt
DC848	Kutant T-celle lymfom UNS
DC849	Modent NK/T-celle lymfom UNS
DC85	Andre og ikke specificerede non-Hodgkin lymfomer
DC850	Lymphosarcoma
DC851	B-celle lymfom UNS
DC851A	Follikelcenter B-celle lymfom
DC851B	Marginal zone B-celle lymfom (immunocytom)
DC851C	Diffust storcellet B-celle lymfom
DC851D	T-cellertigt B-celle lymfom
DC851E	Storcellet intravaskulært B-celle lymfom
DC852	Medastinalt (tymisk) storcellet B-celle lymfom
DC857	Andet non-Hodgkin lymfom
DC857A	Reticulosis lymphatica follicularis
DC857B	Polymorf posttransplantations lymfoproliferativ sygd. (PTLD)
DC859	Lymfom (neoplasi) UNS
DC859A	Malignt lymfom uden specifikation
DC859B	Lymfom uden specifikation
DC86	Andre NK/T-celle lymfomer
DC860	Ekstranodalt NK/T-celle lymfom, nasal type
DC861	Hepatosplenisk T-celle lymfom
DC862	Enteropati-type (intestinalt) T-celle lymfom
DC863	Subkutant panniculitis-lignende T-celle lymfom

Protocol

DC864	Blastisk NK-celle lymfom
DC865	Angioimmunoblastært T-celle lymfom
DC866	Primært kutane CD30-positive T-celle proliferationer
DC866A	Lymfomatoid papulose
DC866B	Primært kutant anaplastisk storcellet lymfom
DC866C	Primært kutant CD30-positivt storcellet lymfom
DC88	Maligne immunoproliferative sygdomme
DC880	Waldenströms makroglobulinæmi
DC881	Paraproteinaemia alpha heavy chain
DC882	Anden heavy chain disease
DC882A	Gamma heavy chain disease
DC882B	My heavy chain disease
DC883	Neopl mal immunoproliferativum intestini tenuis
DC883A	Alpha heavy chain disease
DC883B	Middelhavs lymfom
DC884	Ekstranodalt marginalzone B-celle lymfom
DC884A	Lymfom af mucosa-associeret lymfoidt væv (MALT-lymfom)
DC884B	Lymfom af hud-associeret lymfoidt væv (SALT-lymfom)
DC884C	Lymfom af bronkie-associeret lymfoidt væv (BALT-lymfom)
DC887	Anden malign immunoproliferativ sygdom
DC889	Malign immunoproliferativ sygdom UNS
DC96	An/ikke-spec maligne neoplasier fra lymfoidt/hæmatopoidt væv
DC960	Multifokal og multisyst. Langerhans-celle histiocytosis
DC960A	Histiocytosis X, multisystemisk
DC961	Histiocytosis maligna
DC962	Malign mastcelle tumor
DC962B	Mastcelle sarkom
DC963	Lymphoma mal histiocyticum verum
DC964	Dendritcelle sarkom (accessoriske celler)
DC964A	Interdigiterende dendritcelle sarkom
DC964B	Langerhans-celle sarkom
DC964C	Follikulært dendritcelle sarkom
DC965	Multifokal og unisystemisk Langerhans-celle histiocytose
DC965A	Hand-Schüller-Christian sygdom
DC965B	Histiocytosis X, multifokal
DC966	Unifokal Langerhans-celle histiocytose
DC966A	Eosinofilt granulom
DC966B	Histiocytosis X, unifokal
DC966C	Histiocytosis X UNS
DC966D	Langerhans-celle histiocytose UNS
DC967	Anden malign neopla fra lymfoidt eller hæmatopoietisk væv
DC967A	Histiocytært sarkom
DC968	Malign histiocytose UNS
DC969	Malign neopla fra lymfoidt eller hæmatopoietisk væv UNS

Leukaemia

DC91	Lymfatiske leukæmier
------	----------------------

Protocol

DC910	Akut lymfoblastær leukæmi (ALL)
DC911	Leukaemia lymphatica chronica
DC911A	Lymfoplasmacytær leukæmi
DC911B	Richter syndrom
DC912	Leukaemia lymphatica subacuta
DC913	Leukaemia prolymphocytica
DC914	Hårcelle leukæmi
DC914A	Reticuloendotheliosis leucaemica
DC915	Leukaemia T-lymfocytær hos voksne
DC915A	Adult T-celle lymfom/leukæmi (HTLV-1-assoc.), akut variant
DC915B	Adult T-celle lymfom/leukæmi (HTLV-1-assoc.), kron. Variant
DC915C	Adult T-celle lymfom/leukæmi (HTLV-1-assoc), lymfomatoid var
DC915D	Adult T-celle lymfom/leukæmi (HTLV-1-assoc), smouldering var
DC916	Prolymfocyt leukæmi af T-celle type
DC917	Leukaemia lymphatica anden form
DC917A	Leukaemia aleukaemica lymphatica
DC917B	Large granular T-celle lymfocytær leukæmi
DC918	Moden B-celle leukæmi af Burkitt-type
DC919	Leukaemia lymphatica uden specifikation
DC92	Myeloide leukæmier
DC920	Leukaemia myeloblastica acuta
DC920A	Akut myeloblastær leukæmi med minimal differentiering
DC920B	Akut myeloblastær leukæmi med modning
DC920C	Akut myeloblastær leukæmi, AML1/ETO
DC920D	Akut myeloblastær leukæmi, AML M0
DC920E	Akut myeloblastær leukæmi, AML M1
DC920F	Akut myeloblastær leukæmi, AML M2
DC920G	Akut myeloblastær leukæmi, AML med t(8;21)
DC920H	Akut myeloblastær leukæmi UNS (uden FAB-klassificering)
DC920J	Refraktær anæmi m overskud af blaster i transformation
DC921	Leukaemia myeloides chronica
DC921A	Kronisk myeloid leukæmi med blastkrise
DC922	Leukaemia myeloides subacuta
DC923	Myeloidt sarkom
DC923A	Chloroma
DC923B	Granulocytært sarkom
DC924	Leukaemia promyelocytica
DC924A	Akut myeloblastær leukæmi M3 med t(15;17) og varianter
DC925	Leukaemia myelomonocytica acuta
DC925A	Akut myeloblastær leukæmi M4 Eo med inv(16) eller t(16;16)
DC926	Akut myeloblastær leukæmi med 11q23-abnormalitet
DC926A	Akut myeloblastær leukæmi med variation af MLL-gen
DC927	Leukaemia myeloides anden form
DC927A	Leukaemia aleukaemica myeloides
DC927B	Kronisk neutrofil leukæmi
DC928	Akut myeloid leukæmi med multilinje dysplasi

Protocol

DC929	Leukaemia myeloides uden specifikation
DC93	Monocytære leukæmier
DC930	Leukaemia monocytica acuta
DC930A	Akut monoblastær, AML M5a
DC930B	Akut monoblastær, AML M5b
DC931	Leukaemia monocytica chronica
DC931A	Kronisk myelomonocytær leukæmi, CMML-1
DC931B	Kronisk myelomonocytær leukæmi, CMML-2
DC931C	Kronisk myelomonocytær, CMML med eosinofili
DC932	Leukaemia monocytica subacuta
DC933	Juvenil myelomonocytær leukæmi
DC937	Leukaemia monocytica anden form
DC939	Monocytær leukæmi UNS
DC94	Leukæmi, anden spec
DC940	Akut erytroid leukæmi, M6 (a)(b)
DC940A	Erytroleukæmi UNS
DC941	Erythroleukaemia chronica
DC942	Leukaemia megakaryoblastica acuta
DC943	Mastcelle leukæmi
DC943A	Mastcelleleukæmi
DC944	Panmyelosis acuta
DC945	Myelofibrosis acuta
DC946	Uklassificerbar myelodysplasi/myeloproliferativ sygdom
DC947	Leukaemia anden spec form
DC947A	Leukaemia eosinophilica
DC947B	Aggressiv NK-celle leukæmi
DC947C	Akut basofil leukæmi
DC95	Leukæmi uden specifikation
DC950	Leukaemia acuta uden specifikation
DC950A	Blastcelleleukæmi
DC950B	Leukaemia acuta, stamcelleleukæmi
DC950C	Akut bilineær leukæmi
DC950D	Akut leukæmi af blandet linearitet
DC951	Leukaemia chronica uden specifikation
DC952	Leukaemia subacuta uden specifikation
DC957	Leukaemia anden form uden specifikation
DC959	Leukaemia uden specifikation

Myeloma

DC90	Maligne plasmacelle neoplasier
DC900	Myelomatose
DC901	Plasmacelle leukæmi
DC902	Plasmacytoma extramedullare
DC902A	Myeloma solitarium
DC903	Solitært ossøst plasmacytom

Stem cell transplantation

Protocol

DT860	Afstødning af knoglemarvtransplantat
DT860A	Graft-versus-host reaction
DZ948C	Knoglemarvtransplanteret
DZ948C1	Tilstand med transplanteret knoglemarv, allogen
DZ948C2	Knoglemarvtransplanteret med autolog knoglemarv
DZ948	If not DZ948A, DZ948B, DZ948C and if coded as a B-diagnosis or additional diagnosis together with one of the following A-diagnoses C770, C81–C96, D45–D47, D50–D85, D87–D89, T86.0, T86.0A, or T88.8N

Solid organ transplantation

Oral corticosteroids

H02AB* (excluding injections)

Other immunosuppressants

L01*
L04*
V02CA01
V02CA02

Protocol

Table 4. NOMESCO surgical codes

Chronic kidney disease

KJAK10	Laparotomi med indlæggelse af kateter til peritonealdialyse
KJAK11	Laparoskopisk indl. af kateter til peritonealdialyse
KJAK13	Laparotomi m. omlejring af peritonealt dialysekateter
KJAK14	Laparoskopisk omlejring af peritonealt dialysekateter
KTJA30	Perkutan indlæggelse af kateter til peritonealdialyse
KTJA32	Omlejring af peritoneal dialyse kateter (ikke operativt)
KTJA35	Fjernelse af peritonealdialyse kateter
KKAS	Nyretransplantationer og op. i forbindelse hermed
KKAS00	Autolog nyretransplantation
KKAS10	Allogen nyretransplantation m. nyre fra kadaverdonor
KKAS20	Allogen nyretransplantation m. nyre fra levende donor
KKAS40	Excision af transplanteret nyre
KKAS41	Perkut. endoskopisk excision af transplanteret nyre
KKAS50	Pyelocystotomi på transplanteret nyre
KKAS60	Operation for lymfocele v. transplanteret nyre
KKAS61	Perkut. endoskop. op. for lymfocele v. transplanteret nyre
KKAS70	Uretertransposition til transplanteret urinleder/nyrebækken
KKAS96	Anden operation i forbindelse m. nyretransplantation
KKAS97	An. perkut. endoskop. op. i forb. m. nyretransplant.

Solid organ transplantation

KFQ	Transplantationer af hjerte og lunger
KFQA	Transplantationer af hjerte
KFQA00	Ortotox hjertetransplantation
KFQA10	Ortotox hjertetransplantation m. bicaval anastom.
KFQA20	Ortotox hjertetranspl./rekonstr. af forbind. til atr./sys-vv.
KFQA30	Heterotop hjertetransplantation
KFQA40	Hjertetransplantation med levende donor
KFQA96	Anden transplantation af hjerte
KFQB	Transplantationer af hjerte og lunger
KFQB00	Hjerte-lungetransplantation
KFQB10	Hjerte-lungetransplantation m. bicaval anastom.
KFQB20	Hjerte-lungetransplant./rekonstr. af forbind. atr/syst-vv.
KFQB30	Hjerte-lungetransplant./revaskularis. af bronkial-arterier
KFQB96	Anden transplantation af hjerte og lunge
KFQW	Andre op. v. transplantation af hjerte og lunger
KFQW96	Anden procedure v. transplantation af hjerte og lunger
KGDG	Lungetransplantationer
KGDG00	Transplantation af enkelt lunge
KGDG03	Transplant., en lunge m. revaskularisering af bronkial-art.
KGDG10	Transplantation af begge lunger
KGDG13	Enblock transplant., lunger m. revaskular. af bronkial-art.

Protocol

KGDG30	Lungetransplantation fra levende donor
KGDG96	Anden lungetransplantation
KGDG99	Lungetransplantation, anden
KJLE	Transplantationer af pancreas og op. i forb. Hermed
KJLE00	Allo-total transplant. af pancreas m. pankreatikocystostomi
KJLE03	Allo-total transplant. af pancreas m. pankreatikoenterostomi
KJLE10	Allogen segmental transplantation af pancreas
KJLE16	Allo-segmental transplant. af pancreas fra levende donor
KJLE20	Allogen ø-celle transplantation
KJLE30	Xenogen ø-celle transplantation
KJLE40	Total excision af transplanteret pancreas
KJLE50	Okklusion af pancreasgang på transplanteret pancreas
KJLE56	Omlægn. af pankreatikocystostomi til pankreatikoenterostomi
KJLE96	An. pancreastranspl. el. op. i forb. Hermed
KJLE99	Pancreastransplant. og dermed relaterede operationer, anden
KJJC	Levertransplantation og op. i forbindelse hermed
KJJC00	Allogen levertransplantation
KJJC10	Allogen partiel levertransplantation
KJJC20	Allogen partiel levertransplantation fra levende donor
KJJC30	Xenogen levertransplantation
KJJC40	Xenogen partiel levertransplantation
KJJC50	Resektion af donorlever i forbindelse m. transplantation
KJJC60	Fjernelse af transplanteret lever
KJJC96	An. levertransplantation el. op. i forb. Hermed
KJJC96A	Bench kirurgi (back-table kirurgi) mhp. Leverimplantation

Protocol

Table 5. Procedure codes

Chronic kidney disease

BJFD2	Dialyse ved kronisk nyresygdom
BJFD20	Hæmodialyse ved kronisk nyresygdom
BJFD21	Kontinuerlig ambulant peritonealdialyse, CAPD
BJFD22	Intermitterende peritonealdialyse, IPD
BJFD23	Natlig peritonealdialyse, NPD
BJFD24	Kontinuerlig cyklistisk peritonealdialyse, CCPD
BJFD25	Daglig ambulant peritonealdialyse, DAPD
BJFD26	Hæmodiafiltration
BJFD27	Automatisk peritonealdialyse, APD
BJFZ	Delprocedurer ved dialysebehandling
BJFZ0	Tilslutning af dialyseapparatur til patient
BJFZ00	Tilslutning af hæmodialyseapparatur til patient
BJFZ01	Tilslutning af peritonealdialyseapparatur til patient
BJFZ1	Fjernelse af dialyseapparatur fra patient
BJFZ10	Fjernelse af hæmodialyseapparatur fra patient
BJFZ11	Fjernelse af peritonealdialyseapparatur fra patient
BJFZ4	Delprocedure vedrørende dialysekater
BJFZ40	Anlæggelse af hæmodialysekater
BJFZ40A	Anlæggelse af tunnelleret hæmodialysekater
BJFZ41	Skift af hæmodialysekater
BJFZ41A	Skiftning af tunneleret hæmodialysekater
BJFZ42	Skylning af hæmodialysekater
BJFZ43	Fjernelse af hæmodialysekater
BJFZ43A	Fjernelse af tunnelleret hæmodialysekater
BJFZ44	Omlægning af hæmodialysekater
BJFZ45	Anlæggelse af peritonaldialysekater
BJFZ46	Skift af peritonaldialysekater
BJFZ47	Skylning af peritonaldialysekater
BJFZ48	Fjernelse af peritonaldialysekater
BJFZ49	Omlægning af peritonealdialysekater
BJFZ4A	Tætning af peritoneal dialysekater uden omlægning
BJFZ5	Procedure vedrørende dialysekater
BJFZ50	Skift af hæmodialysekater
BJFZ51	Skylning af hæmodialysekater
BJFZ52	Skift af peritonaldialysekater
BJFZ53	Skylning af peritonaldialysekater
BJFZ6	Slangeskift ved dialysebehandling
BJFZ60	Slangeskift ved peritonealdialysekater
BJFZ9	Tilpasning af dialyseapparatur til patient
BJFZ90	Programmering af kort til individuel dialysebehandling

Protocol

BJFZ91	Justering af individuel dialysebehandling
BJKB	Pædagogiske handlinger i relation til dialyse
BJKB0	Oplæring i brug af kronisk peritonealdialyse, CAPD
BJKB1	Oplæring i brug af maskine til peritonealdialyse
BJKB2	Oplæring i brug af maskine til hæmodialyse
BUBA2	Hæmodialysediæt
BUFC1	Diætvejledning ved dialysebehandling
BUFC10	Initial diætvejledning ved dialyse
BUFC11	Opfølgende diætvejledning ved dialyse
BWDC5	Tilsætning af medicin til peritonealdialysevæske
ZZ0151A	Kontrol i forbindelse med hjemmedialysebehandling
ZZ0151A1	Kontrol i forbindelse med hjemmehæmodialysebehandling
ZZ0151A2	Kontrol i forbindelse med hjemmeperitonealdialysebehandling
ZZ4341	Hæmodialyse, kronisk
ZZ4342	Hæmodialyse, kronisk i dialysecenter
ZZ4343	Hæmodialyse, kronisk i hjemmet
ZZ4346	Peritonealdialyse, kronisk
ZZ4347	Peritonealdialyse, kronisk i dialysecenter
ZZ4348	Peritonealdialyse, kronisk i hjemmet
ZZ4350	Haemofiltratio

Stem cell transplantation

BOQE	Behandling med stamcellekonzentrat
BOQE0	Behandling med stamcellekonzentrat fra knoglemarv
BOQE00	Behandling med stamcellekonzentrat fra autolog knoglemarv
BOQE01	Beh.m. oprenset stamcellekonzentrat fra autolog knoglemarv
BOQE02	Beh.m.stamcellekonz.fra aut.knoglemarv,stimul.in vitro m.vækstfakt
BOQE03	Beh.m.oprens.stamcel.konz.fra aut.knoglemarv stim.in vitro m vækstfak
BOQE04	Behandling med stamcellekonzentrat fra allogen knoglemarv
BOQE05	Beh.m. oprenset stamcellekonz fra allogen knoglemarv
BOQE06	Beh.m.stamcellekonz.fra allogen knoglemarv stim.in vitro m.vækstfakt
BOQE07	Beh.m.oprens.stamcellekonz.fra allog.knoglemarv stim.in vitro væ.fakt
BOQE1	Behandling med stamcellekonzentrat fra autolog knoglemarv
BOQE10	Beh.m.uoprenset,ikke-stim.stamcellekonz.fra autolog knoglem.
BOQE11	Beh.m. oprenset stamcellekonzentrat fra autolog knoglemarv
BOQE12	Beh.m.stamcellekonz.fra aut.knoglemarv,stim.in vitro/vækstf.
BOQE13	Beh.m.oprens.stamcel.konz/aut.knoglem. stim.in vitro/vækstf.
BOQE14	Behandling med stamcellekonzentrat fra allogent perifert blod
BOQE15	Beh.m.oprenset stamcellekonz.fra allogent perifert blod
BOQE16	Beh.m.stamcellekonz.fra allo.perif.blod stim.in vitro m vækstfakt
BOQE17	Beh.m.oprens.stamcelkonz.fra allo.perif.blod stim.in vitro vækstfak
BOQE2	Behandling m. stamcellekonzentrat fra autologt perifert blod
BOQE20	Beh.m.uoprenset,ikke-stim.stamcellekonz/autologt perif.blod

Protocol

BOQE21	Beh. m. oprenset stamcellekonsentrat fra autologt perifert blod
BOQE22	Beh.m.stamcellekonsentrat./aut.perif.blod stim.in vitro m.vækstfak
BOQE23	Beh.m.oprens.stamcel.konsentrat/aut.per.blod stim.in vitro/vækstf.
BOQE3	Beh.m.stamcellekonsentrat fra allogen knoglemarv fra famililedonor
BOQE30	Beh.m.uoprens.ikke-stim.stamcel.konsentrat/allo.knoglemarv/fam.donor
BOQE31	Beh.m. oprens. stamcellekonsentrat/allogen knoglemarv/famililedonor
BOQE32	Beh.m.stamcel.konsentrat/allo.knoglemarv/fam.donor/stim.in vitro/vækstf
BOQE33	Beh.m.oprens.stamcel.allo.knoglemarv/fam.donor/stim.in vitro/v.fa
BOQE4	Beh.m.stamcellekonsentrat./allogent perifert blod fra famililedonor
BOQE40	Beh.m.uoprens.ikke-stim.stamcel.konsentrat/allo.perf.blod/fam.donor
BOQE41	Beh.m. oprens. stamcellekonsentrat/allogent perf. blod/fam.donor
BOQE42	Beh.m.stamcel.konsentrat/allo.perf.blod/fam.donor/stim.in vitro/v.fa
BOQE43	Beh/oprens.stamcel.allo.perf.blod/fam.donor/stim.in vitro/v.fa
BOQE5	Beh. m. stamcellekonsentrat fra allogen knoglemarv/fremmed donor
BOQE50	Beh.m.uoprens.ikke-stim.stamcel.konsentrat/allo.knoglemarv/fremmed donor
BOQE51	Beh.m. oprens. stamcellekonsentrat/allogen knoglemarv/fremmed donor
BOQE52	Beh.m.stamcel.konsentrat/allo.knoglemarv/fr.donor/stim.in vitro/vækstfa
BOQE53	Beh.m.oprens.stamcel.allo.knoglemarv/fr.donor/stim.in vitro/v.fak
BOQE6	Beh.m.stamcellekonsentrat fra allogent perifert blod/fremmed donor
BOQE60	Beh.m.uoprens. ikke-stim.stamcel.konsentrat/allo.perf.blod/fr.donor
BOQE61	Beh.m. oprens. stamcellekonsentrat/allogent perf. blod/frem.donor
BOQE62	Beh.m.stamcel.konsentrat/allo.perf.blod/fr.donor/stim.in vitro/v.fak
BOQE63	Beh/oprens.stamcel.allo.perf.blod/fr.donor/stim.in vitro/v.fak
BOQE7	Behandling med stamcellekonsentrat fra placenta og navlesnor
BOQE70	Beh.m.uoprens. stamcellekonsentrat fra placenta og navlesnor
BOQE71	Beh.m. oprens. stamcellekonsentrat fra placenta og navlesnor
BOQF	Knoglemarvstransplantation (KMT)
BOQF0	Autolog knoglemarvstransplantation
BOQF1	Allogen knoglemarvstransplantation
BOQF11	Allogen knoglemarvstransplantation, famililedoner
BOQF12	Allogen knoglemarvstransplantation, matched unrelated donor
BOQF2	Non myeloablative knoglemarvstransplantation (mini-KMT)
BOQF21	Non myeloablative KMT (mini-KMT), famililedonor
BOQF22	Non myeloablative KMT (mini-KMT), matched unrelated donor

Other immunosuppressants

BOHJ*	Antibody or immune-modulating therapy
BWG*	Cytostatic treatment
BWHB*	Biological therapies
	Or any ATC code for L01*, L04*, V02CA01, or V02CA02 used as additional code in the DNPR
