Supplementary Figure 7. T cell activation is not significantly affected by ONTAK treatment. Humanized mice were treated as in Figure 3. **(A)** The representative plots of HLA-DR⁺ and CD38⁺CD4 or CD8 T cells in spleen. **(B)** Summarized data show HLA-DR⁺ and CD38⁺CD4 or CD8 T cells in spleen. **(C)** The representative plots of HLA-DR⁺ and CD38⁺CD4 or CD8 T cells in bone marrow. **(D)** Summarized data show HLA-DR⁺ and CD38⁺CD4 or CD8 T cells in bone marrow. Error bars display standard deviations.
