

Nest substrate reflects incubation style in extant archosaurs with implications for dinosaur nesting habits

Kohei Tanaka, Darla K. Zelenitsky, François Therrien, and Yoshitsugu Kobayashi

Supplementary Table S1. Mean nest temperature (T_{nest} , °C), mean ambient air temperature (T_{air} , °C), and the difference between T_{nest} and T_{air} (°C) of living covered nesters.

Note that * indicates mean values were calculated in this study using the data provided by the papers.
