

## **Time to exhale: additional value of expiratory chest CT in chronic obstructive pulmonary disease**

Joshua Gawlitza; Frederik Trinkmann, MD; Andreas Fischer, MD; John W. Nance, MD, Claudia Henzler, MD; Joachim Saur, MD; Ibrahim Akin, MD; Martin Borggrefe, MD; Stefan O. Schoenberg, MD; Thomas Henzler, MD for the CType investigators

### **Supplemental Digital Content**

**Figure E1:** correlations of mean lung density (MLD) and forced expiratory volume in one second (FEV<sub>1</sub>) for inspiratory, expiratory and calculated delta values.

**Figure E2:** voxel-density histogram from a qCT. The number of voxels are represented on the y-axis while their HU values are on the x-axis. The full-width-half-max (FWHM) is the full width at the half maximum of this histogram.

**Table E1:** Correlation of quantified CT and lung function parameters for inspiration scan
