

DETECTION OF HUMAN BOCAVIRUS SPECIES 2 AND 3 IN BIVALVE SHELLFISH IN ITALY - Giuseppina La Rosa et al., 2018

(Supplementary material)

Additional samples taken in 2013 and 2015 from points B to F were included in the study following the detection of HBoV in samples taken from point A. Distances between sampling points ranged from 0.49 Km to 3.09 Km.

In detail:

Year	Additional samples	Results
2013 (1 st sampling)	4 samples (points B, C, D and F)	detection of HBoV in all 4 samples
2013 (2 nd sampling)	4 samples (points B, C, D and F)	detection of HBoV in all 4 samples
2015	5 samples (points B, C, D, E and F)	detection of HBoV in 4 samples (points B, C, D and E)
