<sup>a</sup>Probe ID of the Infinium HumanMethylation450 BeadChip. <sup>b</sup>National Center for Biotechnology Information (NCBI) database (Genome Build 37). <sup>c</sup>The Youden index was used as a cutoff value for discriminating NASH-N samples from viral-N samples for each probe. <sup>d</sup>Sensitivity and <sup>e</sup>specificity for discrimination of NASH-N samples from Viral-N samples using individual probes. <sup>f</sup>Viral-N > NASH-N: the sample is predicted to be NASH-N when its DNA methylation level is lower than the cutoff value; Viral-N < NASH-N: the sample is predicted to be NASH-N when its DNA methylation level is higher than the cutoff value. N/A, not annotated (designed in the intergenic regions).
