

# THE LANCET Infectious Diseases

## Supplementary webappendix

This webappendix formed part of the original submission and has been peer reviewed. We post it as supplied by the authors.

This online publication has been corrected. The corrected version first appeared at [thelancet.com/infection](http://thelancet.com/infection) on Jan 10, 2018.

Supplement to: Walker TM, Merker M, Knoblauch AM, et al, and the MDR-TB Cluster Consortium. A cluster of multidrug-resistant *Mycobacterium tuberculosis* among patients arriving in Europe from the Horn of Africa: a molecular epidemiological study. *Lancet Infect Dis* 2018; published online Jan 8. [http://dx.doi.org/10.1016/S1473-3099\(18\)30004-5](http://dx.doi.org/10.1016/S1473-3099(18)30004-5).

## **Supplementary appendix**

Supplement to: Walker TM, Merker M, Knoblauch A, et al. A cluster of multi-drug resistant *Mycobacterium tuberculosis* among patients arriving in Europe from the Horn of Africa: A molecular epidemiological study.

### **Table of contents**

<b>Supplementary Methods</b>	<b>2</b>
<b>Calculation of the maximum likelihood phylogeny</b>	<b>2</b>
<b>Calculation of the minimum spanning tree (MST)</b>	<b>2</b>
<b>Patient questionnaire (English version)</b>	<b>3</b>
<b>Patient questionnaire (German/French version)</b>	<b>15</b>
<b>Supplementary Table 1</b>	<b>28</b>

## **Supplementary Methods**

### **Calculation of the maximum likelihood phylogeny.**

The tree was calculated with PhyML 3.1 utilizing 549 variable genome positions among all isolates and a Generalised Time Reversible (GTR) substitution model. Branches differentiating the identified MDR-TB outbreak from other lineage 4.6.2 MTB isolates are labelled with confidence values based on 100 bootstrap replicates. Step-wise resistance acquisition to individual first- and second-line anti-TB drugs mediated by distinct mutations, and leading to the characteristic resistance profile of the investigated outbreak (black box) indicated on ancestral nodes (red dots).

### **Calculation of the minimum spanning tree (MST).**

The tree was calculated with BioNumerics 7.5 utilizing the identical sequence alignment as used for Figure 1 (549 variable positions (SNPs), respectively the derived distance matrix). The algorithm considers the minimum evolution criteria and reduces the total distance between all samples to a minimum. Number of SNPs differentiating two samples annotated on branches; solid black branches without annotation reflect 1 SNP difference. Compared to a maximum likelihood approach (see Figure 1) no hypothetical (ancestor) states are introduced in a MST, which aligns the Djibouti1 strain directly to the MDR-outbreak, which comprise 24 identical isolates and 5 one-SNP variants. The link between Djibouti1 and the MDR-outbreak can be interpreted as a result of sampling limitations among outlier strains rather than reflecting a direct phylogenetic relationship, i.e. patient-to-patient transmission.

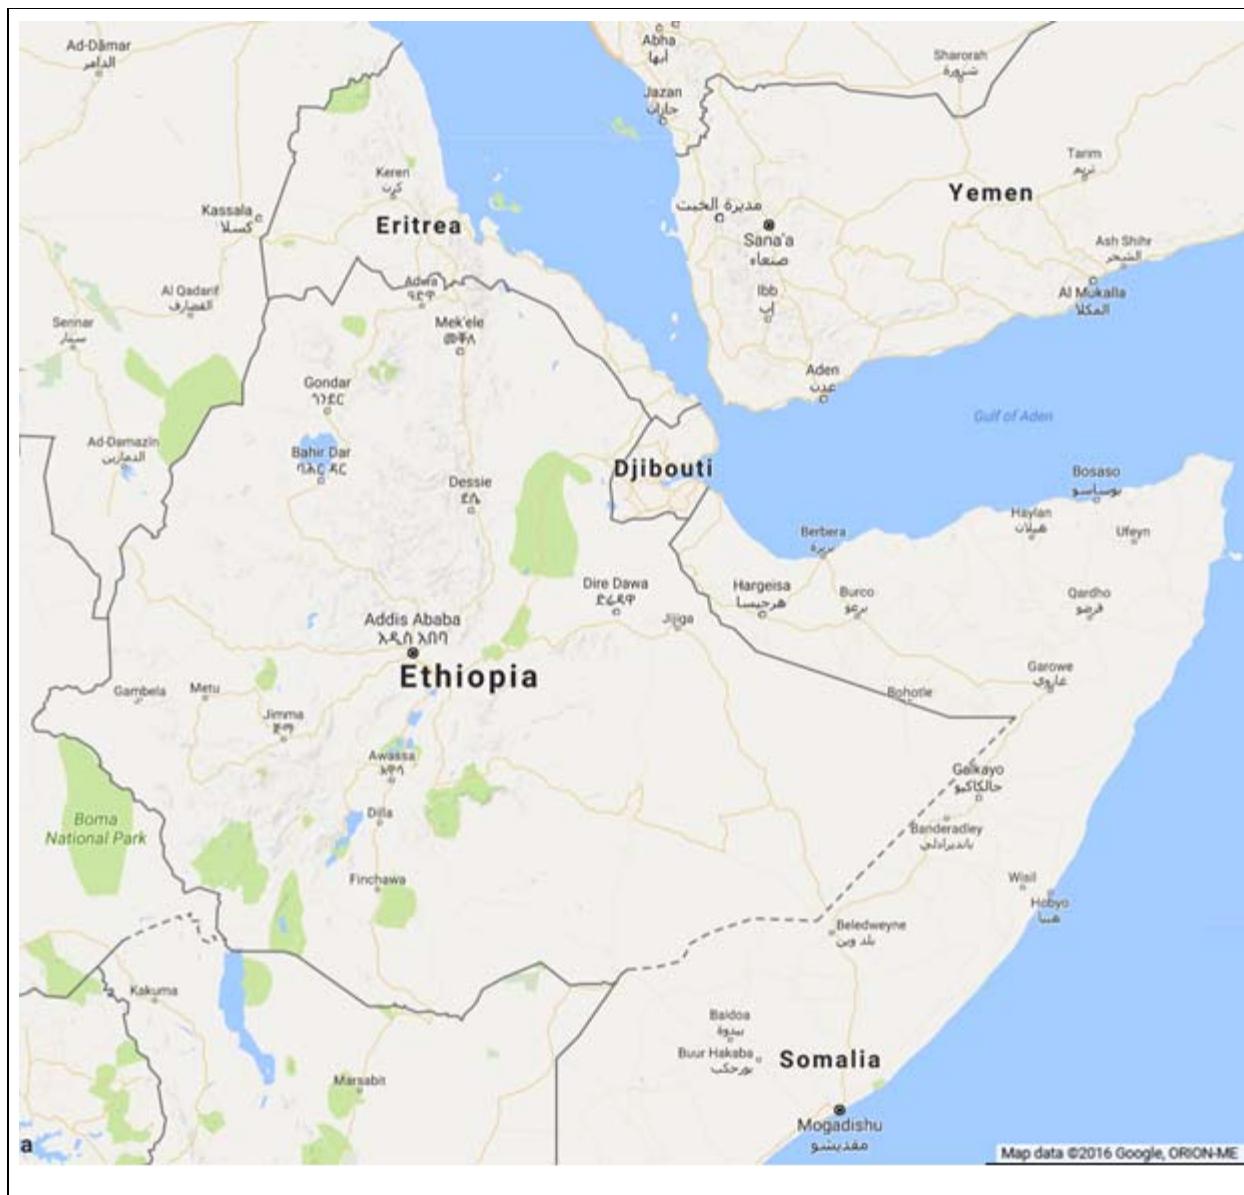

## Patient questionnaire – English version

Published with kind the permission of the Swiss Federal Office of Public Health.

<u>Patient Questionnaire</u>		
<b>A. Information for the patient</b>		
In Switzerland, in 2016, eight cases of multidrug-resistant tuberculosis (MDR-TB) were diagnosed that belong to the same cluster. Further cases from the same cluster were diagnosed in other European countries and therefore a pan-European investigation was initiated. In Switzerland, on 29 November 2016, the Center for Epidemiological Outbreak Investigations (KEA), led by the Swiss Tropical and Public Health Institute (Swiss TPH), was commissioned by the Swiss Federal Office of Public Health (FOPH) to conduct an epidemiological investigation of the cases. The investigation is based on Article 20 of the Registration Ordinance (Meldeverordnung) and on the basis of the Swiss Law on Epidemics. Since the primary objective of the study is to identify the site(s) of infection and the pathways of infection, places of origin of cases, migration routes and places of stay should be defined as precisely as possible geographically and in terms of time periods. The information collected during this interview will be kept strictly confidential and will be accessible only to the study investigators. In particular, this information is not sent to the migration authorities. The questionnaire will be kept in anonymised form, giving you an identification number and your name will not be mentioned or noted down. You have the freedom to answer questions without giving reasons.		
<b>B. General information</b>		<b>Comments</b>
<b>1</b>	Patient ID:	
<b>2</b>	Do you agree that the conversation will be recorded? <input type="checkbox"/> <sub>1</sub> Yes <input type="checkbox"/> <sub>2</sub> No	
<b>3</b>	Languages of the interview: <input type="checkbox"/> <sub>1</sub> German <input type="checkbox"/> <sub>2</sub> French <input type="checkbox"/> <sub>3</sub> Italian <input type="checkbox"/> <sub>4</sub> English <input type="checkbox"/> <sub>5</sub> Somali <input type="checkbox"/> <sub>6</sub> Tigrinya <input type="checkbox"/> <sub>7</sub> Other(s): _____

<b>28</b>	<b>Thank you for your participation!</b>	

## Patient questionnaire – German/French version

Published with kind the permission of the Swiss Federal Office of Public Health.

<b>Patienten-Fragebogen - Questionnaire avec le patient</b>		
<b>A. Patienteninformation</b>		
<b>A. Informations au patient</b>		
In der Schweiz wurden 2016 sieben Fälle von multiresistenter Lungentuberkulose diagnostiziert, die zu demselben Cluster gehören. Weitere Fälle vom selben Cluster wurden in anderen europäischen Ländern diagnostiziert und deshalb wurde eine gesamteuropäische Investigation initiiert. In der Schweiz, wurde am 29. November 2016 das Kompetenzzentrum für Epidemiologische Ausbruchsuntersuchungen (KEA), geleitet vom Swiss Tropical and Public Health Institut (Swiss TPH), vom Schweizerischen Bundesamt für Gesundheit (BAG) mit einer epidemiologischen Untersuchung der Fälle beauftragt. Die Untersuchung erfolgt basierend auf Art. 20 der Meldeverordnung sowie auf Grundlage des Schweizerischen Epidemigesetzes. Da das Primärziel der Untersuchung die Ermittlung des/der Ansteckungsort(e) und/oder der Ansteckungswege ist, gilt es Herkunftsorte, Reiseroute und Aufenthaltsorte geographisch und zeitlich möglichst genau einzuzgrenzen. Die Informationen die während dieses Interviews erhoben werden, werden streng vertraulich behandelt und sind nur den Studienmitarbeitern zugänglich. Insbesondere werden diese Informationen nicht den Migrationsbehörden zugestellt. Der Fragebogen wird in anonymisierter Form gehalten, wobei Ihnen eine Identifikationsnummer zugeteilt wird und Ihr Name nicht erwähnt oder notiert wird. Sie haben die Freiheit, Fragen nicht zu beantworten, ohne Angaben von Gründen. En Suisse en 2016, huit cas de la tuberculose multirésistante (MDR-TB) ont été diagnostiqués, qui appartiennent au même ADN-Cluster. D'autres cas de du même Cluster ont été diagnostiqués dans d'autres pays Européens, ce qui a initié le lancement d'une enquête pan-européenne. En Suisse, le 29 Novembre 2016, le « Kompetenzzentrum für Epidemiologische Ausbruchsuntersuchungen (KEA) » (Centre de compétence pour les enquêtes épidémiologiques), dirigé par l'Institut Tropical et Santé Publique Suisse (Swiss TPH), a été chargée par l'Office Fédérale de Santé Publique Suisse (OFSP) de mener l'enquête épidémiologique de ces cas. L'enquête est effectuée sur la base de l'art. 20 du règlement de l'information et sur la base de la loi sur les épidémies en Suisse. Puisque l'objectif principal de l'étude est de déterminer le(s) lieu(x) d'infection et/ou les voies d'infection, il est nécessaire de délimiter les lieux d'origine, l'itinéraire migratoire y inclue les séjours aux endroits données avec la plus grande précision possibles en termes de géographie et temporelle. Les informations recueillies au cours de cet entretien seront strictement confidentielles et ne sont accessibles qu'au personnel de l'étude. En particulier, cette information ne sera pas partagée aux autorités de l'immigration. Le questionnaire sera conservé sous une forme anonyme. Un numéro d'identification vous sera attribué et votre nom ne sera pas mentionné ou cité dans le questionnaire. Vous avez la liberté de ne pas répondre à une question, sans donner de raisons.		
<b>B. Informations générales</b>		
1	Numéro ID du patient:	Comment.
2	Sind Sie damit einverstanden, dass das Gespräch aufgenommen wird? Êtes-vous d'accord que la conversation est enregistrée? <input type="checkbox"/> 1 Oui <input type="checkbox"/> 2 Non	
3	Sprachen des Interviews: Langue(s) de l'entretien: <input type="checkbox"/> 1 Allemand <input type="checkbox"/> 2 Français <input type="checkbox"/> 3 Italien <input type="checkbox"/> 4 Anglais <input type="checkbox"/> 5 Somalien <input type="checkbox"/> 6 Tigrinya <input type="checkbox"/> 7 Autre(s): _____
