Supporting information Figure S1

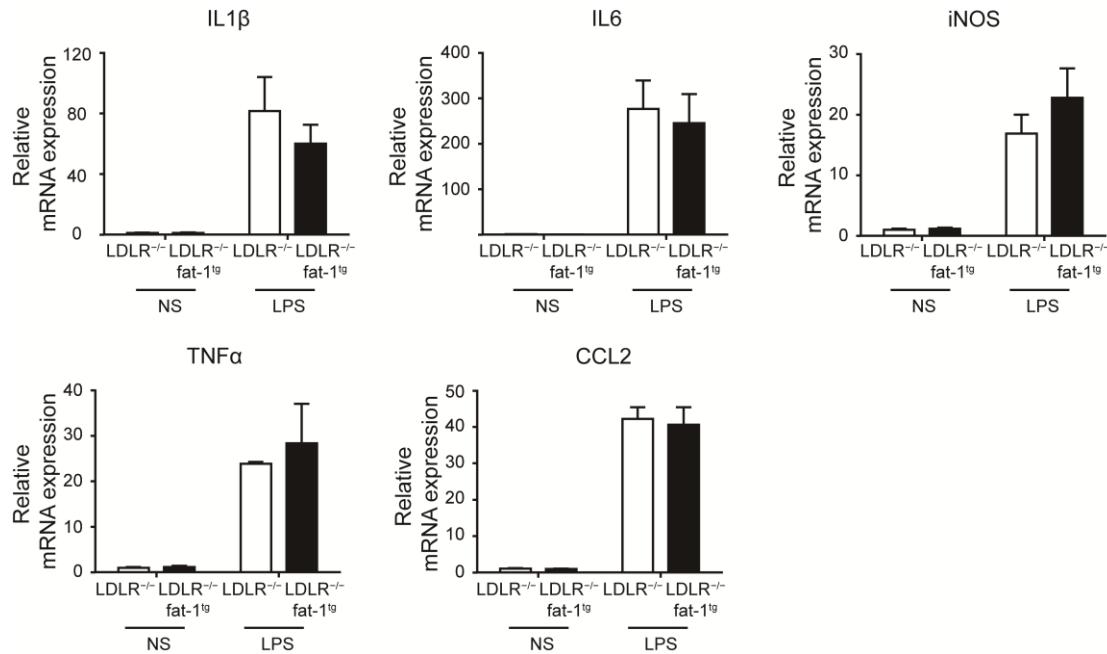

Figure S1. LPS induced the proinflammatory gene expression in macrophages from in LDLR $^{-/-}$ and LDLR $^{-/-}$ -fat-1 tg mice.

Macrophages were isolated from LDLR $^{-/-}$ and LDLR $^{-/-}$ -fat-1 tg mice. Proinflammatory gene expression were measured of the macrophages after lipopolysaccharide stimulation (1 ng ml $^{-1}$) for 4 h. n = 5 for each group. Data are mean \pm SEM.
