

SUPPLEMENTARY FIGURE

Supplementary Figure 1: A, B, C. effect of treatment with 5-aza-dC (100 nM), VPA (2.5 mM) or the combination of both drugs on *sst*₁, *sst*₃ and *sst*₅ expression in BON-1 cells. **D, E, F.** effect of treatment with 5-aza-dC (50 nM), VPA (1 mM) or the combination of both drugs on *sst*₁, *sst*₃ and *sst*₅ expression in QGP-1 cells. Data are the mean ± SEM and expressed as the percentage of untreated control cells. The expression levels were normalized to housekeeping gene *hprt*. *p<0.05, **p<0.01, ***p<0.001.
