

Figure S7. The effect of ACC and KMBA treatment on Arabidopsis growth in comparison to SA187-inoculated seedlings.

Complete data to spider graphs in Figure 7C and Figure 8B. Fresh weight (A), root length (B), and lateral root density (C) of 17-day-old seedlings grown on $\frac{1}{2}$ MS + 100 mM NaCl for the last 12 days. Values represent means of three biological experiments, each in two technical replicates (> 33 seedlings). Error bars represent SE. Asterisks indicate a statistical difference from mock-inoculated plants based on Student t-test (* P < 0.05; ** P < 0.01; *** P < 0.001).
