

- **Figure S3. DNA methylation probes identified by flexible criterion in SCC and their correlation with corresponding gene expression.**
- Three more sites were identified in SCC samples using more flexible criterion: cg06646494 in *KDM2B*, cg00121158 in *KDM4C*, cg06615743 in *KDM4B*. A-B shows cg00121158 and cg06615743 and their correlation with corresponding gene expression.
