

Panax bipinnatifidus

chloroplast genome

156,248 bp

- photosystem I
- photosystem II
- cytochrome b/f complex
- ATP synthase
- NADH dehydrogenase
- RubisCO large subunit
- transfer RNAs

- other genes
- RNA polymerase
- ribosomal RNAs
- clpP, matK
- ribosomal proteins (SSU)
- ribosomal proteins (LSU)
- hypothetical chloroplast reading frames (ycf)
