

**Supplementary figure 1.** Impaired B-cell maturation in the bone marrow of SIFD patients

A.

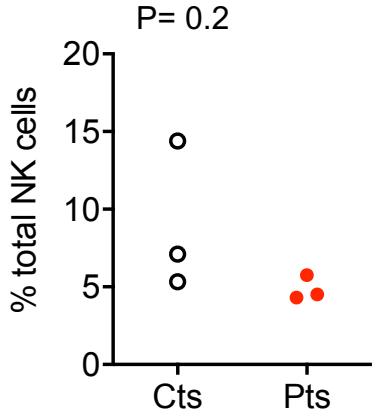

B.

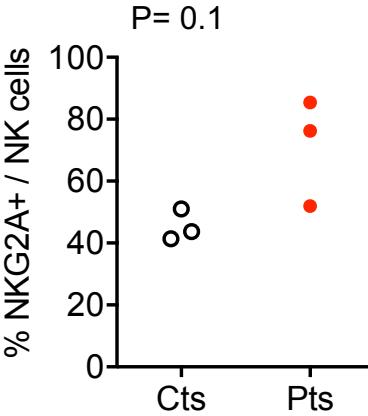

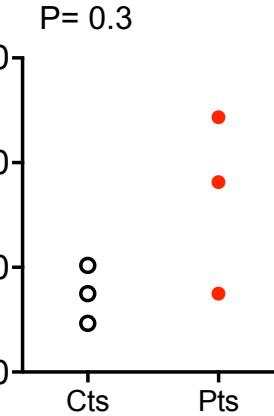

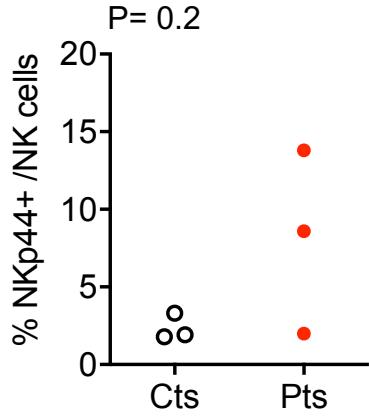

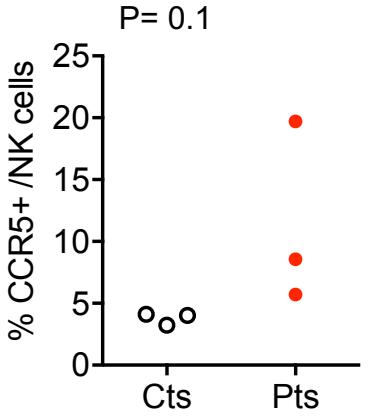

Cts n=6; Pts n=4

**Supplementary figure 2. NK cell phenotype and function**

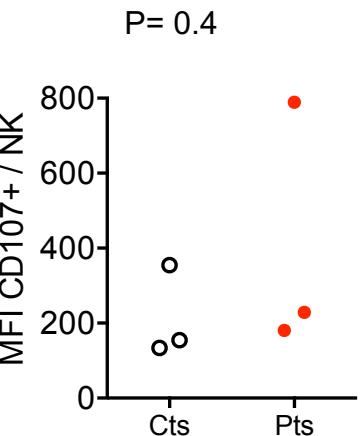

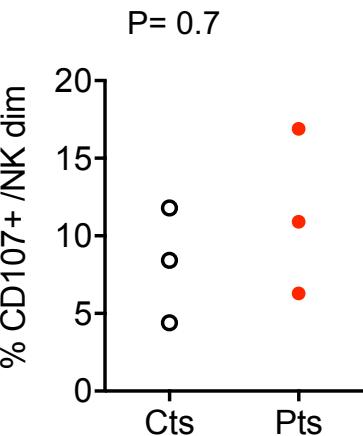

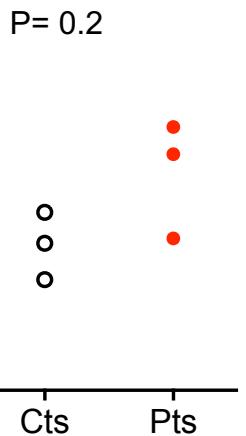

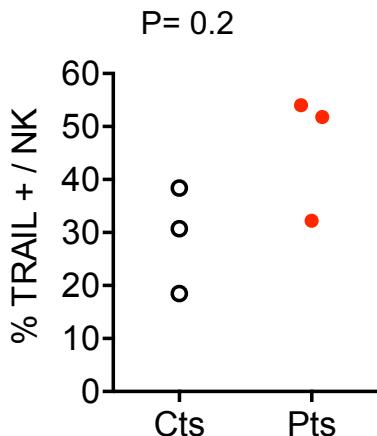

**A.**

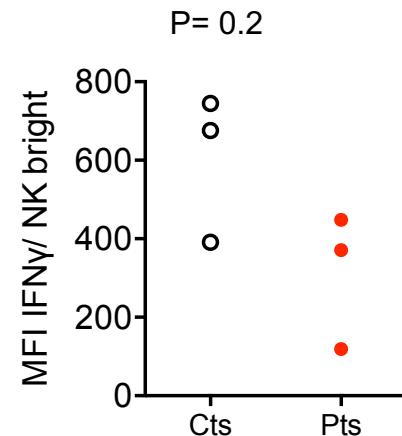

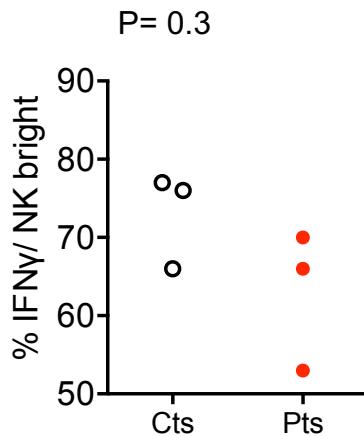

**B.**

**C.**

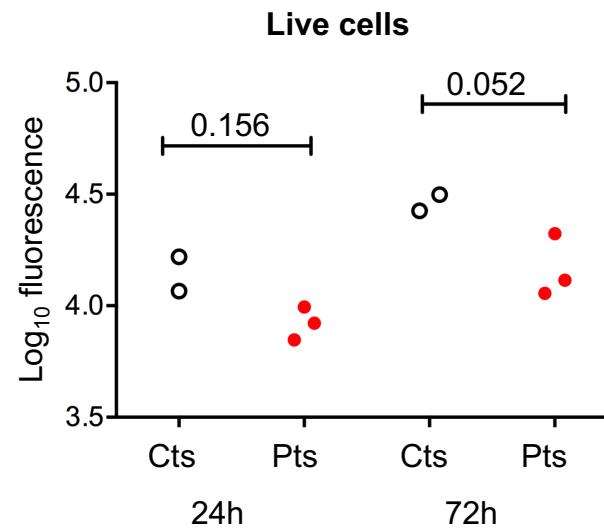

**D.**

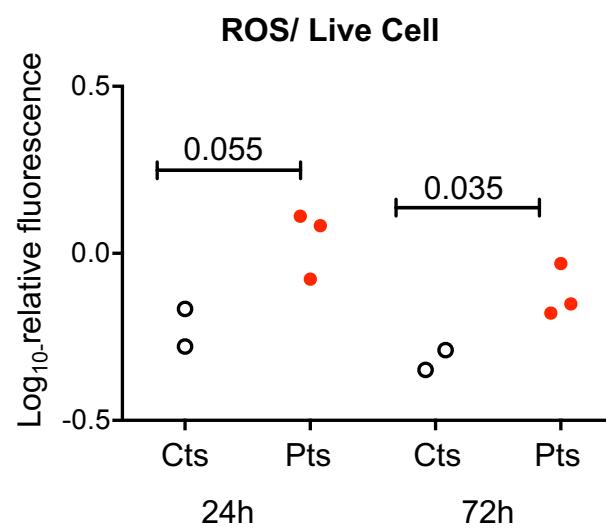

Cts n=3 Pts n=3

**Supplementary figure 3.** ROS overproduction

**A.**

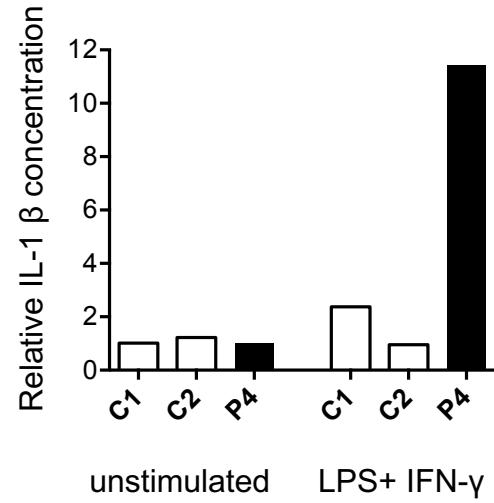

**B.**

**Supplementary figure 4.** IL-1 $\beta$  production

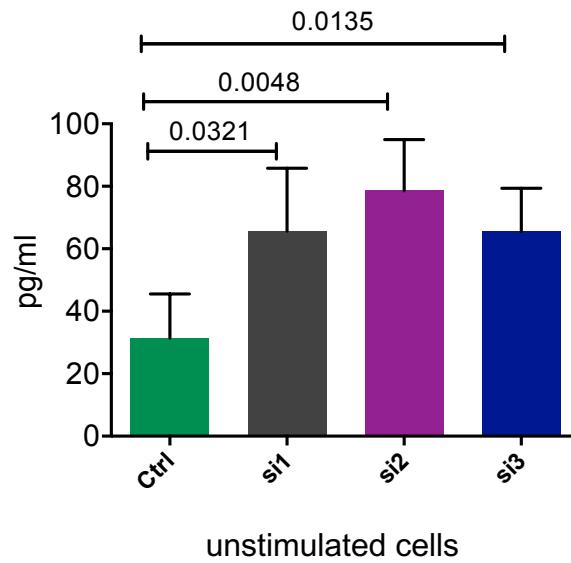

**A.**

IL-1 $\beta$  in P4 cell supernatant

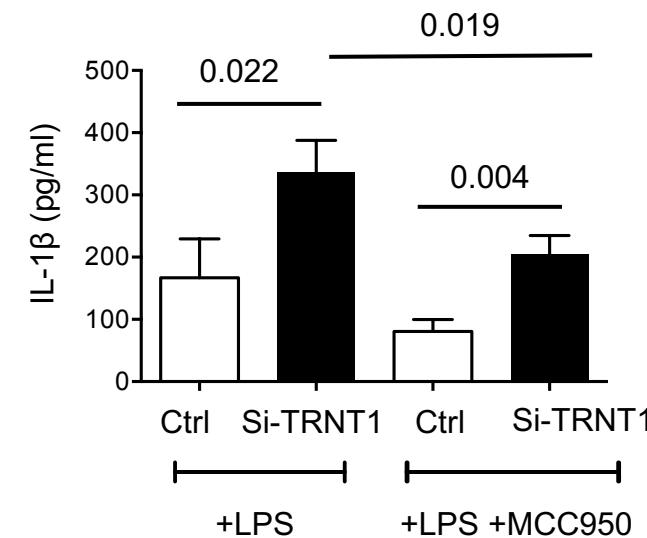

**B.**

IL-1 $\beta$  in THP-1 cell supernatant

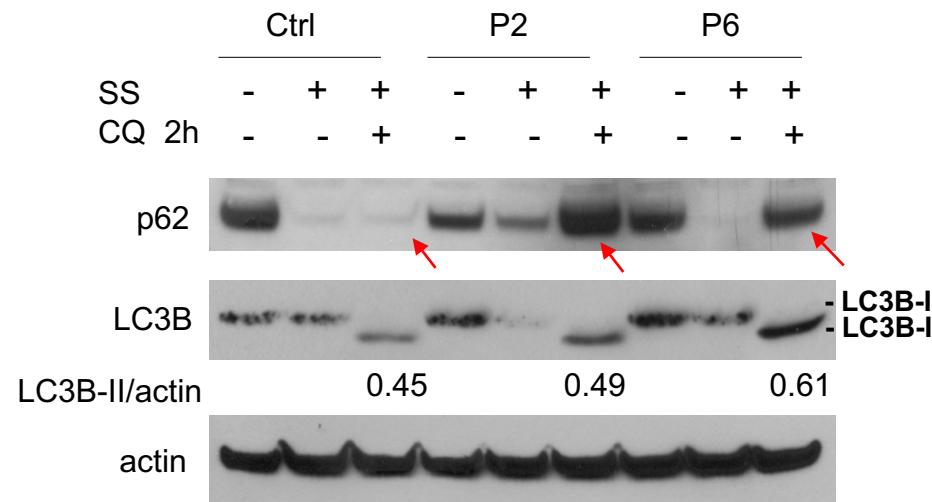

**C.**

IL-1 $\beta$  in THP-1 cell supernatant

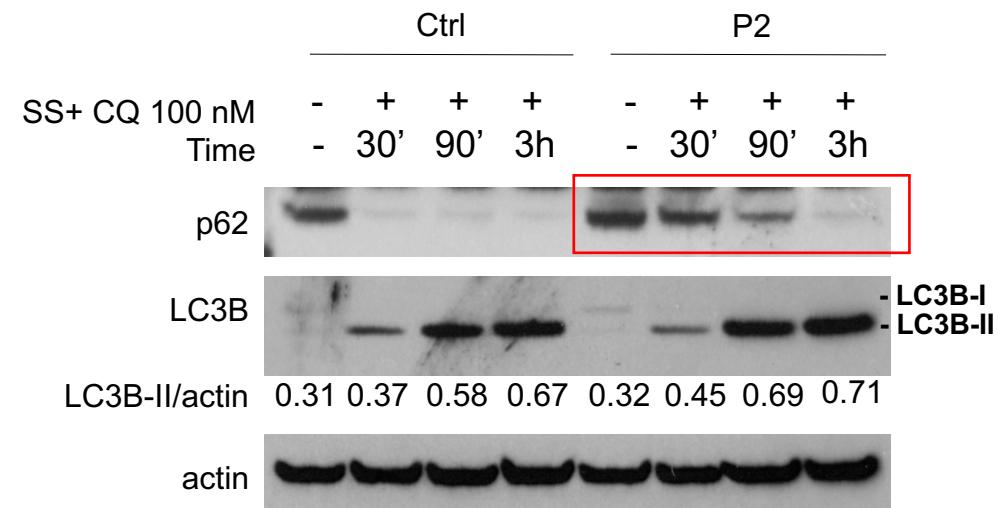

**Supplementary figure 5.** Defective degradation of the ubiquitin-scaffold protein, p62, in mutant cells

**A.**

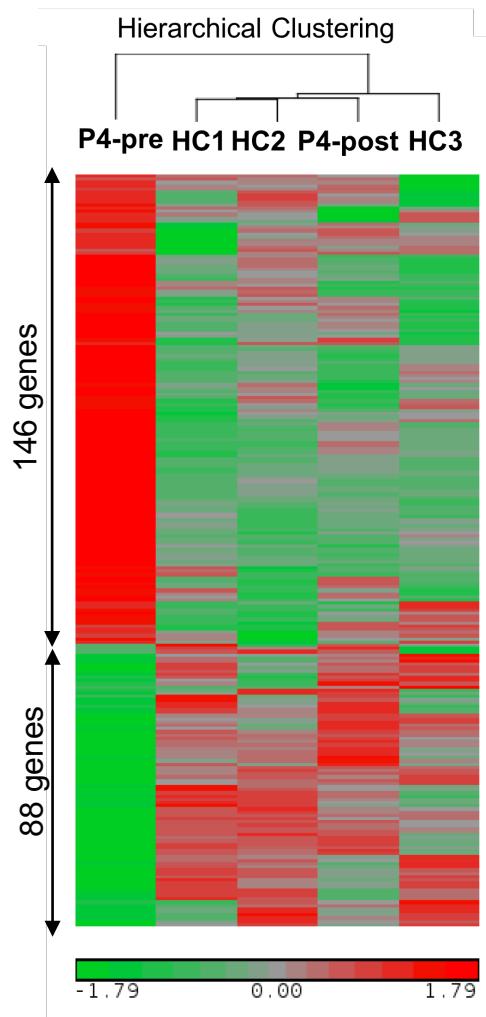

**B.**

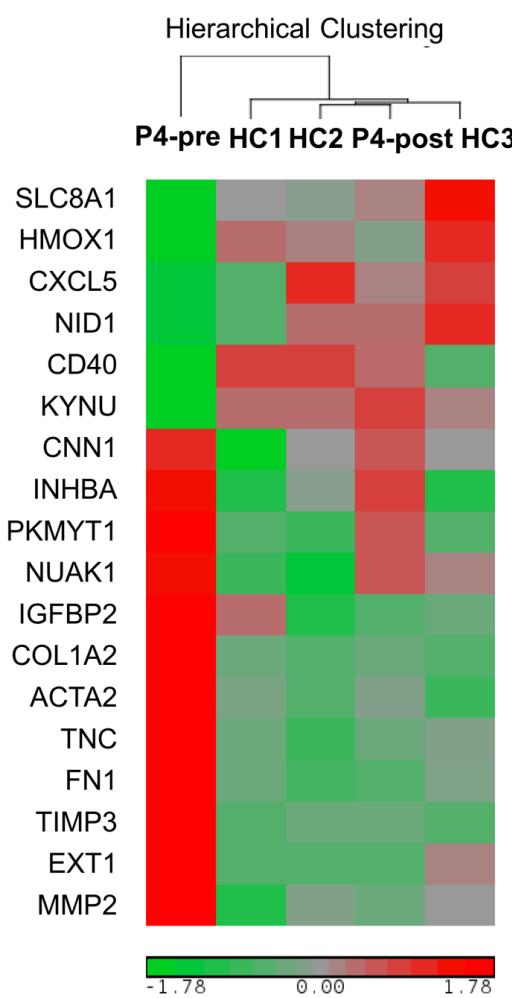

**Supplementary figure 6.** Changes in gene expression after treatment with TNF-inhibitor

**A.**

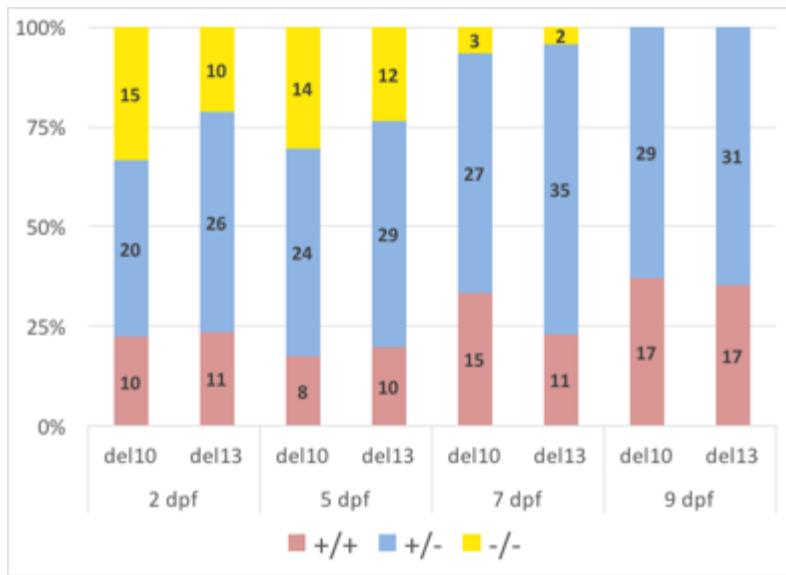

**B.**

**Supplementary figure 7.** Viability and phenotype of *trnt1* knockout zebrafish embryos

**A.**

**B.**

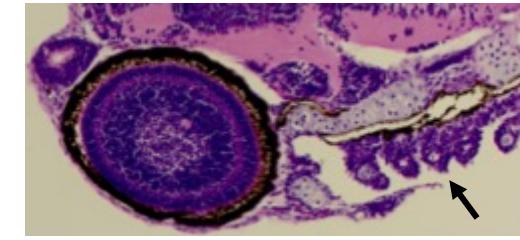

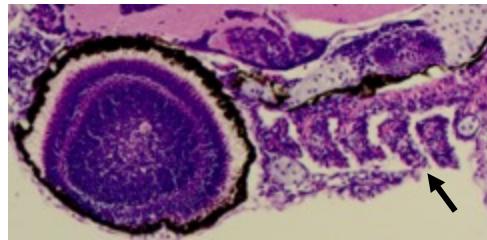

WT

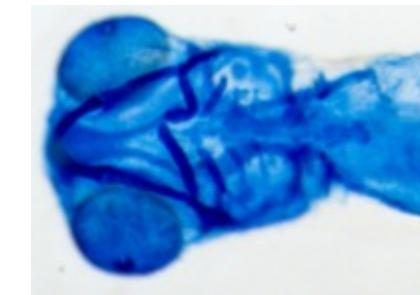

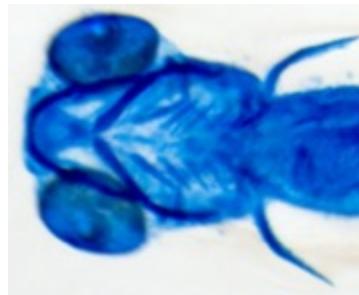

*trnt1*<sup>-/-</sup>

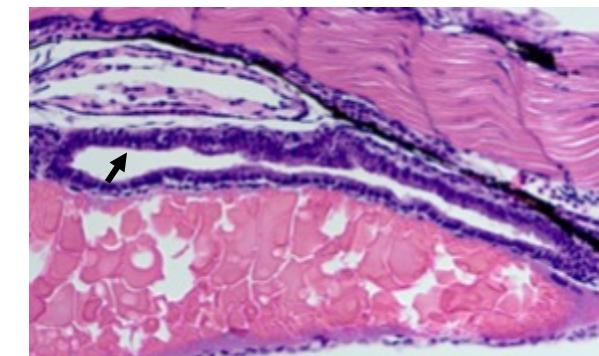

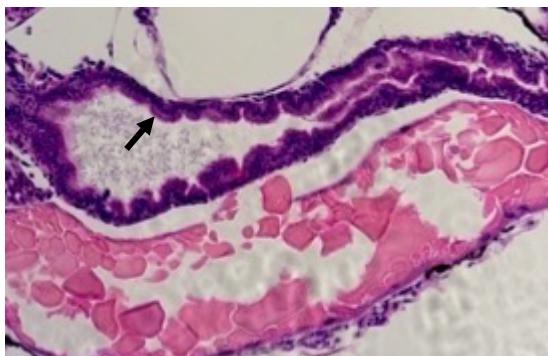

**C.**

**D.**

**E.**

**Supplementary figure 8 . Reduced neuromast hair cells in *trnt1* mutants**
