>The main issue is to incorporate the data DOI into the "Availability of supporting data section", mentioning that code snapshots and tabular test data is available in the GigaScience GigaDB repository. You then need to cite the dataset (probably as reference 25) and include the following citation in the references:

>Albanese, D; Riccadonna, S; Donati, C; Franceschi, P (2018): Supporting data for "A practical tool for Maximal Information Coefficient analysis" GigaScience Database. <http://dx.doi.org/10.5524/100427>

We added the required reference and changed the text accordingly.
