

Supporting Information Figure 2: Reflectance spectra of *Adelpha iphicles* (model) and *Adelpha serpa* (mimic) white wing bands from (a) Costa Rica and (b) Ecuador. Shown are mean values with 95% confidence intervals (shaded). *Adelpha iphicles* is brighter overall (including in UV), and *A. serpa* has more relative blue reflectance compared to *A. iphicles*. Figure (a) reproduced with permission from Finkbeiner et al. 2017 [19].
