**Table S6.** Moran's index values for the response variable and the residuals of the averaged models of abundance and number of species (richness) of cliff-nesting raptors and the common raven in Teno, Tenerife, Canary Islands per 1x1 km cell.

	Response variable		Residuals	
	Moran's I	P-value	Moran's I	P-value
Abundance (all species)	0.0506	<0.001	0.0025	0.239
Abundance (excluding Egyptian Vulture)	0.0439	<0.001	0.0001	0.383
Abundance (excluding common kestrel)	0.0095	0.040	0.0453	<0.001
Abundance (excluding Egyptian vulture and common Kestrel)	-0.0045	0.749	0.0542	<0.001
Kestrel abundance	0.0543	<0.001	0.0175	0.003
Richness (all species)	0.0497	<0.001	-0.0134	0.4359
Richness (excluding Egyptian vulture)	0.0403	<0.001	-0.0100	0.7143
