

Supplementary Material to "Genome-wide analysis of the Glycerol-3-Phosphate Acyltransferase (GPAT) gene family reveals the evolution and diversification of plant GPATs"

Dataset: 49 anatomical parts from data selection: GM_AFFY_SOYBEAN-4

Showing 8 measure(s) of 8 gene(s) on selection: GM-2

0% 100%

Percent of Expression Potential

created with GENEVESTIGATOR

Figure S4 - Microarray data analysis from Genevestigator showing expression pattern of GPATs in anatomical parts of *Glycine max*.
