Table S4: Child Development by Maternal Education. Table displays results from OLS regressions of primary outcomes measures (cognitive development factor and behavioural development factor) on indicators for maternal education. The excluded group (captured by the constant term) is children with mothers who have 11 or fewer years of education. *p<0.10, **p<0.05, ***p<0.01: 2-tailed p-values for difference of regression coefficient from zero. 95% CIs (in parentheses) and P-values adjusted for clustering at the town level.
