**Table S1: Life's Simple 7\* Components**

	<b>Ideal</b>	<b>Intermediate</b>	<b>Poor</b>
<b>Smoking:</b> self-reported, participant questionnaire.	Never smoked	Smoked, but not currently a smoker	Current smoker
<b>BMI:</b> calculated using measured height and weight from participant assessments.	BMI <25	BMI ≥25	BMI ≥30
<b>Physical activity:</b> self-reported, participant questionnaire (International Physical Activity Questionnaire (IPAQ)).	≥150 minutes/week moderate or ≥75 minutes/week vigorous or ≥150 minutes/week moderate + vigorous physical activity	1–149 minutes/week moderate or 1–74 minutes/week vigorous or 1–149 minutes/week moderate + vigorous physical activity	No physical activity
<b>Healthy diet score:</b> self-reported, participant questionnaire (five components: fruits and vegetables; fish; fiber-rich whole grains; sodium; and sugar-sweetened beverages).	Met criteria for 4–5 components	Met criteria for 2–3 components	Met criteria for 0–1 component
<b>Total cholesterol:</b> measured, blood samples taken at assessments; medication use data was from the participant questionnaire.	<200 mg/dl, without medication	200–239 mg/dL or treated to <200 mg/dL	≥240 mg/dL
<b>Blood pressure:</b> measured (automated) and averaged;	<120/<80 mmHg, without medication	systolic BP 120–139 or diastolic BP 80–89	systolic BP ≥140 or

medication use data was from the participant questionnaire.		mmHg, or treated to <120/<80 mmHg	diastolic BP ≥90 mmHg
<b>Fasting serum glucose:</b> measured, blood samples taken at assessments; medication use data was from the participant questionnaire.	<100 mg/dL, without medication	100–125 mg/dL, or treated to <100 mg/dL	≥126 mg/dL

Boldface indicates statistical significance ( $P \leq .05$ )

Abbreviations: ASCVD, atherosclerotic cardiovascular disease; BMI, body mass index (calculated as weight in kilograms divided by height in meters squared); CON, Strong Hearts, Healthy Women-Control; CRP, c-reactive protein; HDL, high density lipoprotein; LDL, low density lipoprotein; SHHC, Strong Hearts, Healthy Communities.

<sup>a</sup> Calculated as weight in kilograms divided by height in meters squared.

<sup>b</sup> Adjusted for Site

<sup>c</sup> Adjusted for Site, Education, Age, Marital Status, and Baseline Value of the Outcome

d Mean Change is Mean Change Baseline to Outcome (immediately following the six-month intervention) with last observation carried forward

**Table S3: Between Group Differences for Changes in BMI, Weight, and CVD Risk Factors (Last Observation Carried Forward)**

	Unadjusted Model 1 <sup>b</sup> (N range = 186-194)		Multivariate Model 2 <sup>c</sup> (N range = 186-194)	
	Difference in Change between SHHC and CON	Mean Difference (SE) <sup>d</sup>	p-value	Mean Difference (SE) <sup>d</sup>
BMI <sup>a</sup>	-0.58 (-0.95, -0.20)	<b>0.003</b>	-0.59 (-1.03, -0.14)	<b>0.01</b>
Weight, kg	-1.68 (-2.83, -0.54)	<b>0.007</b>	-1.70 (-2.96, -0.45)	<b>0.01</b>
