

A**B**

Supplemental Figure 1. A. IL21-VFP reporter construct design. An IRES-VFP cassette was inserted into non-coding exon 5 of the *Il21* gene along with a *Neo^R* selection cassette flanked by loxP sites. The *Neo^R* cassette was excised by cre-mediated deletion resulting in mice containing the IRES-VFP reporter. **B.** IL-21-VFP expression in CD4⁺CXCR5⁺PD-1⁺ gated Tfh and CD4⁺CXCR5⁺PD-1⁻ gated non-Tfh cells from a B6.IL21VFP spleen.
