

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: K_d^{App} values measured in this study. Sheet 1 shows K_d^{App} values measured for SP/KLF consensus motif experiments including IC_{50} values from competition experiments. Sheet 2 shows K_d^{App} values measured for motif survey experiments including with the mycG4 sequence. Sheet 3 shows K_d^{App} values measured in nucleosome and modified nucleosome experiments. All values are in units of nM.

File Name: Supplementary Data 2

Description: Absolute protein quantification of HeLa nuclear lysate
