# Annex B: World Hepatitis Alliance 2014 Survey of Civil Society Stakeholders

This annex presents the two surveys that form the basis of this report: the first was for organisations in countries where governments contributed information to the 2013 WHO hepatitis policy survey and the second was for organisations in countries where governments did not contribute information.

### World Hepatitis Alliance 2014 Survey of Civil Society Stakeholders

A response to the Global Policy Report on the Prevention and Control of Viral Hepatitis in WHO Member States (World Health Organization, 2013)

Your organisation's cooperation is requested in gathering data for the World Hepatitis Alliance's 2014 global hepatitis policy report. This report is seen as a civil society response to information provided by governments for the 2013 global hepatitis policy report published by the World Health Organization (WHO) (http://www.who.int/csr/disease/hepatitis/global\_report/en/).

Other:

The following survey has three parts:

- In Part A your organisation is asked to provide basic information about itself.
- In Part B your organisation is asked to review the actual published text that describes what your government stated for the 2013 report, and to comment on whether the information is correct.
- In Part C your organisation is asked to discuss the policy response to hepatitis in your country in greater depth, focusing on issues that your organisation wishes to prioritise. Your organisation also is invited to put forth an "agenda for change" outlining proposed roles and responsibilities for key stakeholders.

### Part A. Organisational information Organisation name First name of person completing survey Street address Last name of person completing survey Postal code/zip code Country E-mail address Wehsite Phone number (+ ) Please select the <u>one</u> item that best describes your organisation: ☐ NGO: hepatitis patient group ☐ NGO: direct service provider NGO: other (please describe: ■ Medical society Private foundation

#### Part B. Response to Information Reported by Governments Information reported by [country] government Civil society perspective 1. National coordination To our knowledge, this information is accurate. 1.1. Government response to: > In your country, is there a written national strategy or plan To our knowledge, this information is not accurate. that focuses exclusively or primarily on the prevention and We take no position regarding this statement. control of viral hepatitis? If yes, is it exclusive for viral hepatitis or does it also Comments: (200 words maximum) address other diseases? Please indicate components of the strategy or plan. To our knowledge, this information is accurate. 1.2. Government response to: > Is there a designated governmental unit/department To our knowledge, this information is not accurate. responsible only for coordinating and/or carrying out viral We take no position regarding this statement. hepatitis-related activities? Comments: (200 words maximum) > If yes, what is its name? How many people work full-time (or how many full-time equivalent staff) on hepatitis-related activities in all government agencies/bodies? To our knowledge, this information is accurate. 1.3. Government response to: > Does your government have a viral hepatitis prevention To our knowledge, this information is not accurate. and control programme that includes activities targeting We take no position regarding this statement. specific populations? Comments: (200 words maximum) > If yes, please indicate which populations. 2. Awareness-raising and partnerships 2.1. Government response to: To our knowledge, this information is accurate. > Did your government hold events for World Hepatitis To our knowledge, this information is not accurate. Day 2012? We take no position regarding this statement. Has your government funded any public viral hepatitis Comments: (200 words maximum) awareness campaigns since January 2011, other than World Hepatitis Day? 2.2. Government response to: To our knowledge, this information is accurate. Does your government collaborate with any civil society To our knowledge, this information is not accurate. group within your country (such as patient groups or We take no position regarding this statement. national or local nongovernmental organisations) to develop and implement its viral hepatitis prevention and Comments: (200 words maximum) control programme? > If yes, please name major partners.

To our knowledge, this information is not accurate. We take no position regarding this statement. Comments: (200 words maximum)
<ul> <li>4.5. Government response to:</li> <li>Is there a specific national strategy and/or policy/ guidelines for preventing hepatitis B and hepatitis C infection in health care settings?</li> <li>If yes, are health workers vaccinated against hepatitis B prior to starting work that might put them at risk of exposure to blood?</li> </ul>	To our knowledge, this information is accurate. To our knowledge, this information is not accurate. We take no position regarding this statement. Comments: (200 words maximum)
<ul> <li>4.6. Government response to:</li> <li>Is there a national policy on injection safety in health-care settings?</li> <li>If yes, what type of syringes does the policy recommend for therapeutic injections?</li> <li>Are single-use or auto-disable syringes, needles and cannulas always available in all health care facilities?</li> </ul>	<ul> <li>□ To our knowledge, this information is accurate.</li> <li>□ To our knowledge, this information is not accurate.</li> <li>□ We take no position regarding this statement.</li> <li>Comments: (200 words maximum)</li> </ul>

Information reported by [country] government  (All text in this column is copied from the Global Policy Report on the Prevention and Control of Viral Hepatitis in WHO Member States, 2013)	Civil society perspective (please complete by selecting one check-box in each cell)	
<ul> <li>4.7. Government response to:</li> <li>What are your government's official estimates of the number and percentage of unnecessary injections administered annually in health care settings? (e.g., injections that are given when an equivalent oral medication is available)</li> </ul>	<ul> <li>□ To our knowledge, this information is accurate.</li> <li>□ To our knowledge, this information is not accurate.</li> <li>□ We take no position regarding this statement.</li> <li>Comments: (200 words maximum)</li> </ul>	
<ul> <li>4.8. Government response to:</li> <li>Is there a national infection control policy for blood banks?</li> <li>Are all donated blood units (including family donations) and blood products nationwide screened for hepatitis B?</li> <li>Are all donated blood units (including family donations) and blood products nationwide screened for hepatitis C?</li> </ul>	<ul> <li>□ To our knowledge, this information is accurate.</li> <li>□ To our knowledge, this information is not accurate.</li> <li>□ We take no position regarding this statement.</li> <li>Comments: (200 words maximum)</li> </ul>	
<ul> <li>4.9. Government response to:</li> <li>Is there a national policy relating to the prevention of viral hepatitis among people who inject drugs?</li> </ul>	<ul> <li>□ To our knowledge, this information is accurate.</li> <li>□ To our knowledge, this information is not accurate.</li> <li>□ We take no position regarding this statement.</li> <li>Comments: (200 words maximum)</li> </ul>	
<ul> <li>4.10. Government response to:</li> <li>Does your government have guidelines addressing how hepatitis A and hepatitis E can be prevented through food and water safety?</li> </ul>	<ul> <li>□ To our knowledge, this information is accurate.</li> <li>□ To our knowledge, this information is not accurate.</li> <li>□ We take no position regarding this statement.</li> <li>Comments: (200 words maximum)</li> </ul>	
5. Screening, care and treatment		
<ul> <li>5.1. Government response to:</li> <li>How do health professionals in your country obtain the skills and competencies required to effectively care for people with viral hepatitis?</li> <li>Are there national clinical guidelines for the management of viral hepatitis?</li> <li>If yes, do they include recommendations for cases of HIV co-infection?</li> <li>If no, are there national clinical guidelines for the management of HIV that include recommendations for co-infection with viral hepatitis?</li> </ul>	<ul> <li>□ To our knowledge, this information is accurate.</li> <li>□ To our knowledge, this information is not accurate.</li> <li>□ We take no position regarding this statement.</li> <li>Comments: (200 words maximum)</li> </ul>	

<ul> <li>5.2. Government response to:         <ul> <li>Does your government have a national policy relating to screening and referral to care for hepatitis B? For hepatitis C?</li> <li>5.3. Government response to:</li></ul></li></ul>	To our knowledge, this information is accurate.  To our knowledge, this information is not accurate.  We take no position regarding this statement.  Comments: (200 words maximum)  To our knowledge, this information is accurate.  To our knowledge, this information is not accurate.
Please answer the following questions about hepatitis B and hepatitis C testing in your country.  > When testing, do people register by name?  > If people register by name, are their names kept confidential	
<ul> <li>Is the test free of charge for all individuals?</li> <li>Is the test free of charge for members of any specific group?</li> <li>Is the test compulsory for members of any specific group?</li> </ul>	We take no position regarding this statement.  Comments: (200 words maximum)
<ul> <li>5.4. Government response to:</li> <li>Is publicly funded treatment available for hepatitis B? If yes, who is eligible?</li> <li>Is publicly funded treatment available for hepatitis C? If yes, who is eligible?</li> <li>How much does the government spend on publicly funded treatment for hepatitis B and hepatitis C?</li> </ul>	To our knowledge, this information is accurate.  To our knowledge, this information is not accurate.  We take no position regarding this statement.  Comments: (200 words maximum)
<ul> <li>5.5. Government response to:</li> <li>Which hepatitis B drugs and hepatitis C drugs are included on the national essential medicines list or are subsidised by the government?</li> </ul>	To our knowledge, this information is accurate.  To our knowledge, this information is not accurate.  We take no position regarding this statement.  Comments: (200 words maximum)

#### Part C. Key Hepatitis Policy Issues and Proposed Agenda for Change

For Part C, your organisation is asked to discuss the policy response to viral hepatitis in your country in greater depth, focusing on one or more of five topics listed below. Please follow these steps:

Choose one of the five topics:

- 1. National coordination
- Awareness-raising, partnerships and resource mobilisation (WHO Axis 1)<sup>1</sup>
- 3. Evidence-based policy and data for action (WHO Axis 2)1
- 4. Prevention of transmission (WHO Axis 3)1
- 5. Screening, care and treatment (WHO Axis 4)<sup>1</sup>

Write your organisation's assessment of the national response to viral hepatitis as it relates to the topic you chose (maximum 400 words and please use the box below). Some points to consider are:

- > What are the greatest problems with this component of the national response to viral hepatitis?
- > What needs to change?
- What should be the government's role in bringing about these changes? What responsibilities should the government have?
- What should be the roles and responsibilities of other stakeholders at the community, national and international levels? (You may wish to list these in bullet points.)
- What evidence exists to support your organisation's viewpoint? (Consider, for example, citing surveys, research reports, statistics and newspaper articles.)

Please repeat these steps for as many of the five topics as you wish to address.

### World Hepatitis Alliance 2014 Survey of Civil Society Stakeholders

A response to the Global Policy Report on the Prevention and Control of Viral Hepatitis in WHO Member States (World Health Organization, 2013)

Your organisation's cooperation is requested in gathering data for the World Hepatitis Alliance's 2014 global hepatitis policy report. This report is seen as a civil society response to information provided by governments for the 2013 global hepatitis policy report published by the World Health Organization (http://www.who.int/csr/disease/hepatitis/global\_report/en/).

All World Health Organization member states were surveyed for the 2013 report. Civil society organisations in countries where governments responded to the survey are being invited to comment on the information that their governments provided. Your government **did not** respond to the 2013 survey. The World Hepatitis Alliance therefore would like to ask you to complete a modified version of its 2014 survey of civil society stakeholders. The following survey has two parts:

- In Part A your organisation is asked to provide basic information about itself.
- In Part B your organisation is asked to discuss the policy response to hepatitis in your country, focusing on issues that your organisation wishes to prioritise. Your organisation also is invited to put forth an "agenda for change" outlining proposed roles and responsibilities for key stakeholders.

### Part A. Organisational information Organisation name First name of person completing survey Street address Last name of person completing survey Postal code/zip code Position Country E-mail address Website Phone number (+ ) Please select the <u>one</u> item that best describes your organisation: ☐ NGO: hepatitis patient group ■ NGO: direct service provider NGO: other (please describe: ☐ Private foundation Other:

#### Part B. Key hepatitis policy issues and proposed agenda for change

For Part B, your organisation is asked to discuss the policy response to viral hepatitis in your country in greater depth, focusing on one or more of five topics listed below. Please follow these steps:

Choose one of the five topics:

- 1. National coordination
- Awareness-raising, partnerships and resource mobilisation (WHO Axis 1)<sup>1</sup>
- 3. Evidence-based policy and data for action (WHO Axis 2)<sup>1</sup>
- 4. Prevention of transmission (WHO Axis 3)1
- 5. Screening, care and treatment (WHO Axis 4)1

Write your organisation's assessment of the national response to viral hepatitis as it relates to the topic you chose (maximum 400 words and please use the box below). Some points to consider are:

- > What are the greatest problems with this component of the national response to viral hepatitis?
- > What needs to change?
- What should be the government's role in bringing about these changes? What responsibilities should the government have?
- What should be the roles and responsibilities of other stakeholders at the community, national and international levels? (You may wish to list these in bullet points.)
- What evidence exists to support your organisation's viewpoint? (Consider, for example, citing surveys, research reports, statistics and newspaper articles.)
