

Kehm RD, Spector LG, Poynter JN, Vock DM, Osypuk TL. Socioeconomic status and childhood cancer incidence: a population-based multilevel analysis. Am J Epidemiol.

Web Materials:

Web Figure 1. Bivariate Associations Between Categorical SES and Combined Childhood Cancer Incidence; Registry-Based Case-Cohort Study, Linked Minnesota Birth and Cancer Records, 1989-2014 (Total Sample=14,854; Controls=11,907)

Web Table 1. Characteristics of Cases by Cancer Type; Registry-Based Case-Cohort Study, Minnesota Cancer Surveillance System Linked to Minnesota Birth Registry, 1989-2014 (Total Sample=14,854)

Web Table 2. Correlation Matrix; Registry-Based Case-Cohort Study, Linked Minnesota Birth and Cancer Records, 1989-2014 (Total Sample=14,854)

Web Table 3. Associations Between Neighborhood SES and Childhood Cancer Incidence Estimated From Bivariate and Trivariate Models; Registry-Based Case-Cohort Study, Linked Minnesota Birth and Cancer Records, 1989-2014 (Total Sample=14,854; Controls=11,907)

Web Table 4. Associations Between Established Risk Factors and Childhood Cancer Incidence, Unadjusted and Adjusted for SES, by Cancer Type; Registry-Based Case-Cohort Study, Linked Minnesota Birth and Cancer Records, 1989-2014 (Total Sample=14,854; Controls=11,907)

Web Table 5. Associations Between Paternal Involvement and Combined Childhood Cancer Incidence; Registry-Based Case-Cohort Study, Minnesota Cancer Surveillance System Linked to Minnesota Birth Registry, 1989-2014 (Total Sample=14,854; Controls=11,907)

Web Table 6. Associations Between SES and Combined Childhood Cancer Incidence Stratified by Rural/Urban Status; Registry-Based Case-Cohort Study, Minnesota Cancer Surveillance System Linked to Minnesota Birth Registry, 1989-2014 (Total Sample=14,854; Controls=11,907)

Web Table 7. Correlation Matrix of the Five Census Tract Measures Included in the Neighborhood SES Composite Index; Registry-Based Case-Cohort Study, Minnesota Cancer Surveillance System Linked to Minnesota Birth Registry, 1989-2014 (N=14,854)

Web Table 8. Associations Between Dimensions of Neighborhood SES and Combined Childhood Cancer Incidence; Registry-Based Case-Cohort Study, Minnesota Cancer

Surveillance System Linked to Minnesota Birth Registry, 1989-2014 (Total Sample=14,854; Controls=11,907)

Web Table 9. Testing Validity of Linearly Interpolated Census Tract SES Composite Index: Associations Between Neighborhood SES and Combined Childhood Cancer Incidence; Registry-Based Case-Cohort Study, Minnesota Cancer Surveillance System Linked to Minnesota Birth Registry, 1989-2014 (Total Sample=14,854; Controls=11,907)

Web Table 10. Associations Between SES and Incidence of Childhood Lymphomas Stratified by Cancer Subtype; Registry-Based Case-Cohort Study, Minnesota Cancer Surveillance System Linked to Minnesota Birth Registry, 1989-2014 (Total Sample=14,854; Controls=11,907)

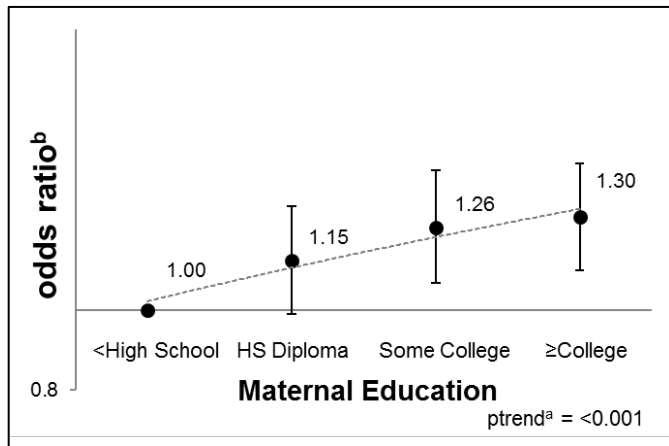

Web Table 11. Associations Between Maternal Education and Incidence of Childhood Central Nervous System Tumors Stratified by Cancer Subtype; Registry-Based Case-Cohort Study, Minnesota Cancer Surveillance System Linked to Minnesota Birth Registry, 1989-2014 (Total Sample=14,854; Controls=11,907)

Web Table 12. Associations Between SES and Combined Childhood Cancer Incidence Stratified by Age Group at Diagnosis; Registry-Based Case-Cohort Study, Minnesota Cancer Surveillance System Linked to Minnesota Birth Registry, 1989-2014 (Total Sample=14,854; Controls=11,907)

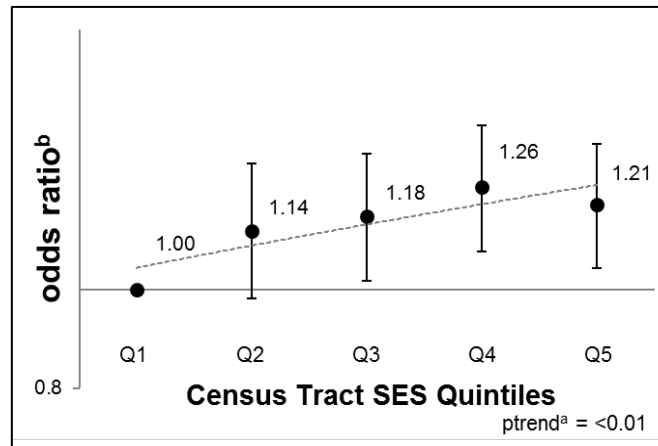

Web Table 13. Associations Between SES and Combined Childhood Cancer Incidence Stratified by Race and Ethnicity; Registry-Based Case-Cohort Study, Minnesota Cancer Surveillance System Linked to Minnesota Birth Registry, 1989-2014 (Total Sample=14,854; Controls=11,907)

Web Figure 1. Bivariate Associations Between Categorical SES and Combined Childhood Cancer Incidence; Registry-Based Case-Cohort Study, Linked Minnesota Birth and Cancer Records, 1989-2014 (Total Sample=14,854; Controls=11,907)

A. Individual-level SES (entire sample: $n = 14,854$)

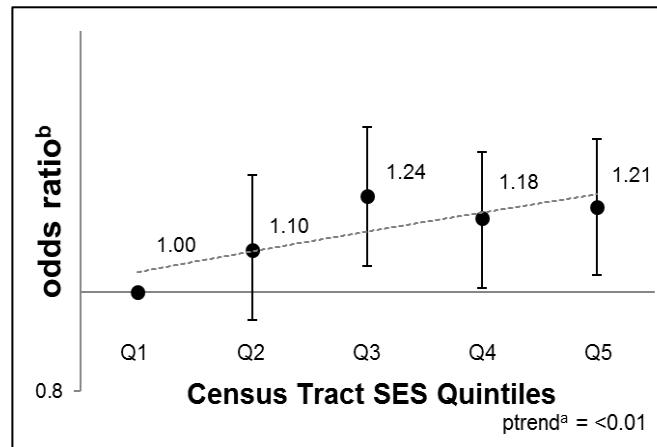

B. Neighborhood-level SES (entire sample: $n = 14,854$)

C. Individual-level SES (NH-whites only: $n = 12,127$)^c

D. Neighborhood-level SES (NH-whites only: $n = 12,127$)^{cd}

Abbreviations: HS, high school; NH, non-Hispanic; SES, socioeconomic status

^aP-trend tests linear combination across categories; estimated from a logistic mixed model with a random intercept for census tract clustering using a two-sided hypothesis test.

^bOdds ratios and 95% confidence intervals plotted on the log scale; reference = lowest SES category (<high school/Q1 neighborhood).

^cNon-Hispanic White Sample: Cases = 2,496; controls = 9,631

^dCensus tract SES index values recategorized into quintiles among the restricted non-Hispanic white sample.

Web Table 1. Characteristics of Cases by Cancer Type; Registry-Based Case-Cohort Study, Minnesota Cancer Surveillance System Linked to Minnesota Birth Registry, 1989-2014 (Total Sample=14,854)

Variable	ALL (n = 673)	AML (n = 112)	Lymph (n = 311)	CNS (n = 662)	Neuro (n = 267)	Retino (n = 80)	Wilms' (n = 198)	Hepato (n = 50)	Rhabdo (n = 79)
<i>Birth Characteristics</i>									
Birth year, mean (SD)	1999 (6.2)	2000 (6.4)	1999 (6.5)	1999 (6.5)	2001 (7.3)	2002 (7.2)	2000 (6.7)	2001 (6.9)	1998 (5.9)
Female sex, %	45.8	50.0	34.4	45.9	40.8	53.8	44.4	28.0	41.8
Birth weight, mean (SD), grams	3,475 (588)	3,541 (583)	3,438 (574)	3,461 (560)	3,400 (328)	3,423 (549)	3,508 (640)	2,803 (1,118)	3,457 (552)
Gestation, mean (SD), weeks	38.9 (1.9)	39.1 (1.6)	39.0 (1.8)	39.0 (2.0)	38.7 (2.2)	39.0 (1.9)	38.8 (2.2)	36.1 (5.4)	38.7 (1.8)
First born, %	38.6	34.8	35.7	42.0	42.0	41.3	40.6	42.0	43.0
<i>Mother's Characteristics</i>									
Age at delivery, mean (SD), years	28.5 (5.8)	29.1 (5.6)	28.6 (5.2)	28.3 (5.5)	28.4 (5.9)	27.6 (5.7)	28.6 (5.7)	28.0 (5.9)	28.7 (6.2)
Non-Hispanic White, %	84.3	78.4	83.2	89.4	85.0	76.3	90.4	74.0	88.6
Education, %									
< high school diploma	8.9	9.3	6.9	9.1	8.7	10.4	7.1	22.5	10.3
high school diploma	28.0	9.3	28.2	25.8	26.4	19.5	26.5	32.7	33.3
some college	26.3	20.4	30.5	28.9	26.4	33.8	30.6	20.4	32.1
≥ bachelor's degree	36.9	37.0	34.4	36.2	38.5	36.4	35.7	24.5	24.4
Neighborhood SES, mean (SD)	0.07 (6.4)	0.05 (1.0)	0.11 (0.9)	0.13 (0.8)	0.00 (0.9)	0.05 (1.1)	0.09 (0.8)	-0.3 (1.2)	0.11 (0.8)

Abbreviations: ALL, acute lymphoblastic leukemia; AML, acute myeloid leukemia; CNS, central nervous system tumors; Hepato, hepatoblastoma; Lymph, lymphomas; Neuro, neuroblastoma; Retino, retinoblastoma; Rhabdo, rhabdomyosarcoma; SD, standard deviation; SES, socioeconomic status; Wilms', Wilms' tumor

Web Table 2. Correlation Matrix; Registry-Based Case-Cohort Study, Linked Minnesota Birth and Cancer Records, 1989-2014 (Total Sample=14,854)

Variable	Correlation ^a								
	1	2	3	4	5	6	7	8	9
1. Birth Year	1								
2. Female	-0.02	1							
3. Mother NH White	-0.16	0.01	1
