INT01

Good afternoon, my name is XX from USUMA GmbH, from an independent social research institute in Berlin.

We are doing a study about justice and well-being on behalf of Ruhr University Bochum. A representative selection of citizens age 18 and over will be asked, where individuals will be determined according to an exclusive selection principle. Your household was selected as well. In order to get a meaningful result, the participation of a person in your household is very important.

First I would like to identify the person with whom we want to fill in the questionnaire in your household.

First, I need a few details of the persons in your household.

The conversation would not take longer than 12 minutes.

In the context of our scientific study we are interested in different aspects of personal well-being in the population and your personal estimate, for example, of justice and freedom in USA.

Cordially, we would ask you to support us. The participation is, of course, free. There will be no disadvantages if you do not participate at the study or those will be cancelled in the process. Your participation, however, will support our research.

Do you agree upon to start with the questionnaire?

SW1

Would you be so kind to tell me how many people live in your household who are 18 years and older, yourself included?
