

Lectin pathway protein	Progressive disease (n=191)	Stable disease (n=83)	Difference between medians	95% Confidence Interval
M-ficolin, ng/ml	5375 (1096-18538)	5335 (2954-11529)	40	-441 to 446
L-ficolin, ng/ml	3245 (872-9230)	3763 (1487-8500)	-518	-758 to 36
MASP-1, ng/ml	10013 (2439-24591)	10628 (3065-56002)	-615	-1660 to 184
MAp19, ng/ml	555 (242-996)	564 (305-818)	-9	-32 to 39

Supplemental figure 7. Lectin pathway protein levels in stable and progressive IgA nephropathy
 Values represent median with range of values in parentheses; MBL - mannan-binding lectin; MASP –
 MBL-associated serine protease; MAp, - MBL-associated protein.
