Hello. I am _____ from _____

We are working with the MRC/UVRI Uganda Research Unit on AIDS to review your participation in the COSTOP trial which is now at its conclusion. We will be asking you questions about your participation in the COSTOP trial. The information about you and your responses to these questions will be used by the researchers at MRC/UVRI Uganda when reporting on the COSTOP trial, to describe the extent to which participants in either study group of COSTOP complied with the requirements of the study protocol. This information will be very useful in explaining the overall results of the COSTOP trial. All information obtained from this enquiry will be kept confidential and none of it will be presented in such a way that you can be identified.

We are asking your help to ensure that the information we collect is accurate. You may refuse to answer any question or choose to stop the interview at any time.

Do you have any questions about this interview?

Do I have your permission to proceed?
