

# Supplemental Figure 1

**Figure S1. Expression of select hypoxia-inducible CA isoforms in the intervertebral disc.** A, B) High magnification merged images of K19 and CAIX (A) and CAXII (B) in tail discs showing cellular localization. C, D) Immunofluorescence localization of CAIX (C), CAXII (D), and K19 in the NP and AF of tail discs. Scale bar in A and B is 100 mm and in C and D is 100 mm. 3 independent biological replicates were analyzed for each experiment.

**Table S1:** Primer sequences used for Chromatin Immunoprecipitations
